How to clean a windshield
not that you need to know
—with us around

Sounds simple, but we've spent thousands of dollars analyzing road film and finding what takes it off best. We learned, for instance, that road film varies in different parts of the West; so we developed cleaners we know get it off. And in case your windshield's bugged up, we have a special cure for that, too.

After plenty of cleaner comes plenty of stiff rubbing. It takes a special knack to rub out streaks—but our equipment and training get 'em. Finally, we polish the wind wings till they're spotless, clean the rear window, and buff the headlights.

Zip! The job's done in less time than it takes to read this. Drop in any time and watch us work on your windshield. Folks say we're champion windshield sparklers...and we give your tires, radiator and battery the same thorough care.
