New Wrinkle with Krumbles

Who says you can't get something for nothing! You get interplanetary interceptors, lunar schooners, cosmic cruisers and other fabulous aircraft, gratis, on the back of Kix cereal boxes. All you have to do is cut them out and assemble the parts-after you successfully complete 10 easy lessons in aviation mechanics from your nearest correspondence school,

But that's kid stuff. Kellogg's, General Mills, Nabisco and the Quaker people are taking a new tack with their cereal package cutouts.

Breakfast isn't complete without scissors, pastepot and slide rule these days. The whole family gets in on the fun over the coffeepot-that is, if there are any families able to tackle the intricate projects on the back of their cereal boxes before Pop dashes for the office and the youngsters board the school bus. (How will Dagwood Bumstead ever make the bus now?)

While the toddlers clip around-the-world paper dolls from Krumbles and extract a paper zoo, installment by installment, from Corn-Soya Shreds, the older children can sing all-time hit tunes printed complete with music on Bran Flakes as they study Raisin Bran Flakes' "fascinating facts worth reading."

For Mom and Dad, breakfast playtime is like a trip to the city planning board's office. They can reconstruct a model city -six blocks of it-from the General Mills cereal tray cartons. Of course, this metropolis wouldn't be complete without Nabisco's miniature carnival . . . that should provide the gay night life.

After this preliminary session, the head of the family should start eating Kellogg's All-Bran. What if he can't abide bran? That doesn't matter-he gets, free, pictures and floor plans of honest-to-goodness houses. The kind you live in. If he really facts are apparent in this ancient police. And ministers of the inwants to go places, he can send in the box top plus 15 cents and city, which begins to breathe terior throughout Europe are creased their strength at the polls get a three-dimensional, full-color model house with complete of the Italian election. architectural blueprints, landscaping directions, decorating hints and interior sketches. (With a box top, optional, and \$8,000 feat of the com--cash-he might even get that house built.)

But that's not all. The cereal manufacturers are going to do something toward strengthening of world peace and international understanding. Kellogg's plan to the Italian neointroduce post cards on its cereal packages with directions to facists. On American breakfast-eaters to start correspondence with "pen contrary, the pals" all over the world. Wait till Molotov hears about that!

Of course, some of the "old school" cereals cling to such time-tested "free" prizes as recipes, silverplated tableware, Wild went to the par-West paraphernalia and pictures of Hollywood characters.

Maybe you'd like a nice jet plane? Well, start eating Pep.

World "Movers and Shakers"

Take time out from war's alarums, the cares of home and Altogether, the stage is set for in amiable tranquilty. Indeed, order to take up arms — as no toil of the marketplace to listen to music this week. For it's a healthy, democratic Italian re- the Italians decided the future more than 50,000 men. Yet the "music week" again. Enjoyment of music should not be com- vival. pressed into a seven-day span, for it has year-round value; Second, and almost more im- world, almost in a mood of fiesta. still the special week permits extra emphasis and a passing of portant, no intoxication from No one listened seriously to the ically, the communist position is compliments to those who provide us with music—the artists, has resulted from the victory over ror and retribution. the musicians of lesser talent but perhaps greater generosity, the communists. On the contrary, Even in the most ferociously and the teachers of music. This is the week when harmonies the leaders of the government communist towns, anti-communswell all over the land, a climax for the season of instruction have carefully noted that an im- ists dared to speak their minds a large party section in Sicily

Music speaks a varied language, from the throbbing of was driven by hardship and de- this, the outcome would have the voting. A big breakaway of drums in the African forests to the stately roll of harmony in end of freedom in Italy. It is a Bach Chorale. But always it speaks to a mood, whether it foolish to expect miracles. But Scelba is far from complacent. munist labor chieftain Di Vitbe the mother's lullaby or the martial music of a military band since de Gasperi and the men He does not jubilantly hail the torio's recent switch on the Maror the sensuous cacophony of a swing orchestra. As the poet around him frankly admit there election returns as a decisive and shall plan has caused speculation Arthur O'Shaughnessy wrote in "The Music-Makers":

And we are the dreamers of dreams, Wandering by lone sea-breakers, And sitting by desolate streams; World-losers and world-forsakers, Of whom the pale moon gleams: Yet we are the movers and shakers Of the world forever, it seems,

We are the music-makers,

Music's language is universal. Every chord that is struck is lost when its echoes fade, to be found again stored in the hearts of men. After the heat and dust and tumult of war we find solace again in the music of Germans and Hungarians and Poles and Russians. Music overleaps walls and penetrates curtains. Its harmonies instruct mankind in unity where speech may divide.

Enjoy then, this week of melody: get the lift of an old hymn, or the pulsing passion of an Italian opera, or the lilt of a Viennese waltz, or the stir of sad-sweet memories in an English ballad-air.

Lesson in Grammar

Perhaps we should wait for that alert monitor of the Oregon press, Bob Sawyer of the Bend Bulletin, to pick this one up from the Oregonian. But to instruct our own customers quite as much as the Ogn editor we'll do the chore. Quoting:

"The legislature is well aware that any sales tax bill it adopted without itself submitting the measure to the people, would

The last word is the atrocity. "Referendum" is the neuter gerund form of the verb "refer." To convert it into verb form merely drop the suffix "endum" and you have the regular verb "refer" for use in its correct tense and case. The sentence quoted

should read ". . . any sales tax bill . . . would be referred." The error is common; and the lesson in grammar should be general. The esteemed editor of the Bulletin has been threatening to buy the Oregonian editors a grammar as well as a dictionary and a book of quotations. All of us writing folk need them, and they should be referred (not referended) to frequently.

"Peck's Bad Boy" on the Court

Chief Justice Vinson banged his gavel angrily to conclude a hearing before the supreme court of the government's charge the CIO violated the Taft-Hartley law against spending money for politics. The offender seems to have been his colleague, Justice Frankfurter, rather than the attorneys at the bar who were peremptorily ordered to stop. Frankfurter has been addressing

peremptorily ordered to stop. Frankfurter has been addressing questions at the attorneys which seemed to have barbs on them.

Frankfurther has one of these high octane minds that work so fast they embarrass others. He is frequently getting into the hair of his colleagues. He's so nimble mentally that he is irritating. While he may seem to be "Peck's bad boy" on the court he adheres to quite a reasonable philosophy in his interpretation of the constitution.

We can't help wondering however if the chief justice led him into the supreme court woodshed after the Thursday hearing.

Of interest to the industrial west is the reduction of prices on steel and steel products for the General Heart and II.

Of interest to the industrial west is the reduction of prices on steel and steel products for the Geneva, Utah, plant of U. S. Steel. Base prices at Geneva are now identical with those for in the se similar products at U. S. Steel's subsidiaries in Pittsburgh, Chicago, Gary and Birmingham. Previously the differential at Geneva was \$3 a ton above other points. There remains the substantial freight charge from Geneva to west coast points, but finally we have a western mill selling on a parity with mills in the east and south. This will be a factor in west coast develop-

Reds Gain Strength

"Tobacco, although not a staple food in the accepted sense of the word, will be included in the program as an agricultural commodity to be supplied by this country. The high value attached to tobacco on the continent makes it an important incentive product for labor. The promise of an increased tobacco ration for greater individual output should prove valuable in spurring productive

He states also that tobacco is one crop we can readily send abroad. Our exportable surplus of grains and fats is limited; but we seem to have plenty of tobacco for domestic use and for export. California likewise has a big surplus of wines. The truth is that our government is using ERP as one means of getting rid of surpluses. Oregon and Washington for instance expect to dispose in this way of apples and pears which lost their foreign markets, when exchange ran out. An amendment by Senator Morse to the ERP bill encouraged this utilization of domestic agricultural surpluses.

Though 256,000 metric tons of tobacco and 142 million gallons of wine look like a huge contribution both to European appetites and to American producers we are managing to include "worth-while" goods in the "mis-

everything, the communists and their stooges have actually inrather, a successful holding ac-

The basic question, as Scelba and other wise members of the government see it, is whether the new, more stable Italian government can at length transform the The raw material of a real victory is here.

metric tons of nitrogen fertilizer; \$136,300,000 worth of farm machinery. We shall finance also for shipment from other countries to Europe 9,165,000 metric

tons of bread grains and 132,000 metric tons of nitrogen fertilizer. The United States News says

that in the first three months we shall furnish Europe with \$75,-000,000 worth of dairy products: \$142,000,000 worth of cotton; \$133,000,000 worth of meats, fats and oils from other countries and \$121,000,000 worth of petroleum products from the middle east and the Carribean area.

There is real danger that the real purpose of the plan - aid to European reconstruction - will be blunted by the greed of those seeking to unload supplies or to restrict the form of assistance for competitive advantage. There seems no excuse for shipping wine to Europe. Little tobacco is grown in Europe yet so eager are its inhabitants for it that a carlon or a pack or even a lone cigarette has been a prime standard of exchange in the postwar period. It does have incentive value whether moralists approve or not - but a quarter of a billion dollars' worth, that looks like overdoing the stimulant - for the benefit of the domestic tobacco
