NOW Transmits **2 TO 6 TIMES MORE SOUND INTENSITY!**
Look again at the picture! Here is a hearing aid complete in one unit so small it fits the tiny watch pocket of a man's trousers! A new Bellone record! Made possible by a new kind of "silver circuit" combining 45 parts and connecting into one moisture-proof, trouble-free unit.
Yes, the receiver transmits 2 to 6 times more sound intensity than any of 12 other hearing aids tested. Twice as much as even the former Bellone model! This is far more sound intensity than you probably need—or even can stand!
But note this: It means almost unbelievable clarity with the power turned way down. This means glorious hearing comfort. And cuts operation cost to a new low—less than a penny an hour.
