New Umbrellas Designed for Lumberjacks

VANCOUVER, B. C., May 17 (CP)—Lumberjacks, the rough and tough men of the woods, aren't going sissy but they may soon be working under umbrellas.

A special style is being manufactured here to protect loggers

from dripping trees and drenching rains.

It is of giant size, 58 inches across, covered with durable material. It has a long handle which fits into the logger's pocket leaving both his hands free.

The woods' umbrella is from the design of Isaac Flader, who has been in the rain-protecting business for 28 years.

He says he designed it particularly for tallymen who have to keep tabulation rain or shine.

Ottawa, the Canadian capital, didn't become Ottawa until 1854; before that it was known as Bytown, after a British colonel, John By.

About That New Roof!

LET US ASSUME THAT ALL ROOFING IS GOOD

Roofing is like anything else of national repute. If it's made by any of America's leading manufacturers, bearing an accepted brand name, it varies little in quality. Good felt base, highest grade asphalt and selected slate granule makes for good roofing.

BUT WHAT ABOUT THE CONTRACTOR?

Contractors, to be worthy of the name should have a proven record of honest performance over a long term of years. A skilled contractor using fine materials and guaranteeing his work is your assurance of the best roof that it is possible to apply.

HOW GOOD IS A GUARANTEE?

A guarantee is only as good as the company that makes it. ANYONE can say a roof is guaranteed for ANY term of years. When we issue a 10-year written guarantee certificate it means just what it says and you can be sure we will be here living with you to back it up every year of its life.

WHY NOT CALL US TODAY FOR A FREE ESTIMATE OF YOUR WORK.

A PERSONAL MESSAGE

from Governor

DEWEY

Two and a half years ago we were the most powerful nation on earth. Today we appear before the world so weak that dictators feel our soldiers can be pushed around and shot in the back.

Our national government is warning us in the gravest terms of war-like conditions. Strange submarines are reported off Alaska, off the Atlantic Coast, and off the shores of California. The Russians have been threatening to throw us out or bully us out of Berlin.

Under all these conditions our government should be doing something to halt the tide. The fact is that our national administration has made almost every possible blunder and we ought to get rid of it at the first possible moment.

Meanwhile there is war talk on every hand. Nothing could be so unnecessary or so tragic. War is the last act of a bankrupt statesmanship. I insist there is absolutely no reason for the fear of war if our government will start waging the peace.

Today there are two great and powerful nations in the world—the United States representing the whole cause of human freedom and Soviet Russia, representing the tyranny of the police state. We Americans propose to live at peace but we have learned that we must be strong enough to be respected in order to keep the peace. We have learned that unless the free world as a whole is strong and stands together, the forces of dictatorship will sense weakness and will set out on a war of conquest.

In the face of recent ominous events in the world, it is

clear that we must start immediately to build up our military strength by whatever means are necessary in order to protect America. Most of all, we must create an air force which is the most powerful striking force in the world.

But military strength alone is not enough. Armaments alone can never preserve peace. We are confronted in the world today, not with the simple threat of military force but with a challenge that strikes at the heart of our whole way of life—a challenge to our American ideals. We need to build up our strength but we need also to build up our faith.

There are too many people in this country and in the world who can see only our little failures, our strikes, our occasional injustices. I am sick to death of hearing people sell America short. The time has come for us, as Americans to re-discover our purpose, our greatness as a nation, our ideals and our enormous competence. When we have done that there is not the slightest doubt that we can and will win the peace. I say again this is not a war crisis; it is a peace crisis, and we must start waging the peace now.
