

West Salem Bridge Users Questioned in Survey

Future positioning of the proposed new Salem-West Salem bridge to replace the present structure will be determined by results of traffic surveys such as the one conducted Thursday by the state highway department. Shown above is a long line of vehicles as their drivers were questioned by six highway department employees. Questions as to origin and destination of the drivers, types of vehicles and use for business or pleasure will aid engineers in locating a new bridge for maximum efficiency. Small photo shows O. J. Sparrow, 383 Sunset st. driver, being questioned by Norman Alexander, Salem route 4, box 222, of the state highway department. Results of the survey will remain undisclosed for an undetermined time pending processing by the highway department. (Photos by Don Dill, Statesman staff photographer.)
