Irish Named No.1 **Eleven in AP Poll**

North Carolina Second, Wildcats Third: California Ranks Ninth

NEW YORK, Oct. 4-(AP)-Notre Dame, picking up where it left off at the end of the regular 1947 season, captured the No. 1 position in the first Associated Press poll to select the nation's ten top teams in the 1948 campaign today by a slim 10-point margin.

The season's inaugural poll, which drew ballots from 153 sports writers from coast to coast, was a tight two-way battle between Notre by Westerly line of a tract of land con-Dame and North Caroline, with Northwestern an impressive third.

North Carolina collected 55 first-place votes, five more than Notre Dame, and 24 second-place votes to 23 for the Irish. But the thirdplace votes-29 for Notre Dame and 21 for Carolina-put the Irish on top.

On the usual basis of 10 points for a first-place vote, nine for second, eight for third, and so on, Notre Dame, tallied extactly 1,200 points as a result of its narrow victory over Purdue and last week's 40-0 walloping of Pittsburgh.

Michigan, which finished second at the end of the 1947 season but swept past Notre Dame into the No. 1 spot in a special poll after the Rose Bowl game, landed in seventh place in today's poll.

In fourth place was Southern Methodist, with 13 votes for first and a total of 882 points, the Mustangs finished third in 1947. Army, which barely missed the top ten in last year's final balloting, placed fifth today with seven first-place votes and a point total of 725. Georgia Tech was sixth with 598 and Minnesota ranked eighth with 407.

California's Pacific Coast conference favorites landed in ninth place, with three first-place votes and 399 points. Penn State, which was fourth at the end of the 1947 season, barely made the first 10 with 305 points, although it received two votes for first.

DEAK employment and steady establishment L of new industries are a reflection of Oregon's stable labor peace. Credit for continuing labor-management cooperation and wise use of labor pools in large measure belongs to Portland's Labor-Management Committee, functioning in Oregon's industrial heart

Nine years ago local labor and management determined to "live and let live." The result was a strong committee representing both, which during the last year alone prevented threatened strikes in five major industries. International heads of unions have sought the committee's advice in working out coastwise and nationwide labor problems, and in addition, it has fostered a program of accomplishment beneficial to the entire state.

AS THIS REGION GROWS SO GROWS PGE

PGE, a member of the Portland Labor-Management Committee, knows well the value of its work and the part that industrial peace is playing in Oregon's growth, PGE's 181,000 customers are those really benefitting from excellent labor-management relations. This

company has had no strikes for more than 30 years and knows that good labor relations are as important in achieving dependable electric service as the vast funds spent on extending and improving power facilities

DECLARATION OF POLICY FOR INDUSTRIAL PEACE

The Officers and Directors of Portland Labor-Management Committee unanimously endorse a Policy of labor and management working together with a true spirit of cooperation to preserve industrial peace and the American way of life and hereby declare t That the basic principle of free enterprise supported by collective bargaining must be the determining factor to guide labor and

management to a full understanding of their responsibility; That equitable wages and fair profits are essential to a stable economy and are an integral part of establishing confidence and mutual understanding between labor and management;

That maintaining agreements is a sacred trust of labor and

That labor and management pledge to their community and State help and assistance to meet the human and economic needs of its people and also their social, educational, moral and spiritual problen

That we pledge to labor and industry and the public who wish to locate in our area this program to insure continuous production by maintaining industrial peace.
