Apple Varieties Classified as to Uses, Time of Year Available

Markets are stocking up with wintertime vegetables and fruits. For some weeks we noted a shortage of avocados, popular salad fruit and now the winter supply has arrived.

Avocados a few years ago were a luxury, appealing mostly to epicures, but now a days they have become known to many more folk.

We like them used instead of butter on toast. Arrange thin slices of the fruit on the hot toast, sprinkle lightly with salt, and eat.

And speaking of winter fruits, good old down-to-earth apples can't be beat. There are some wonderful ones on market now. Some like the sweetness of Delicious for eating. The meat is white and fine grained, mild and fragrant. Golden Delicious has all the attributes of the red Delicious, but comes in a golden yellow tone. Both are excellent for salads too.

Here's a new applesauce, new to us anyway, recommended as an accompaniment to fowl, and an apple relish suggested by experts.
