

Council Vacates School-Used Streets; Beer Hearing Set

Salem city council Monday night vacated numerous streets and alleys which never had been opened and which long since have been "covered" by buildings at the Salem high school and Leslie junior high school properties of school district 24.

The vacations were accompanied by one more in a long series of contentions between the school district and property owners near Leslie school over the status of Alder street, one unopened block of which crosses part of the Leslie athletic field track.

Pope Arrives at Consistory

Pope Declares Cardinal Trial Rigged, Forced

VATICAN CITY, Feb. 14 (AP)—Pope Pius XII today attacked the trial of Josef Cardinal Mindszenty as rigged and an outrage against the Roman Catholic church. He declared that Catholics should resist man-made laws "inconsistent with divine and human rights."

In an address before a secret and extraordinary consistory of the college of cardinals, the pontiff charged that Hungary's communist dominated government sought "to disrupt the Catholic church" there by striking at Cardinal Mindszenty.

His 20-minute long allocution, delivered in Latin, held no hint of further action. The holy congregation of the consistory already has pronounced major excommunication on "all who dared raise their hands against the person of Cardinal Mindszenty, brought him to trial and participated in his infamous trial."

The pope expressed the belief that confessions made in a Budapest courtroom by Cardinal Mindszenty were wrung from him. The physical condition and behavior of the Hungarian prelate appeared to be an accusation "against his very accusers and condemnors," the pope said.

U.S. Rockets Better, Need Bigger Space

WASHINGTON, Feb. 14 (AP)—New strides in the conquest of space by rockets make it necessary for the United States to have a 3,000 mile proving ground for launching such weapons, congress was told today.

Cost of providing such a test area would be \$200,000,000. Although military officials did not disclose full details they indicated a strip extending 3,000 miles in length is contemplated for testing the missiles.

Whether this would extend diagonally across the United States, out to sea or across the borders was not revealed but the bill in the range is proposed would permit it to be established "within or without the continental limits of the United States."

Military and scientific authorities said that this country will have rockets this year capable of traversing 500 miles and that eventually their horizontal range may be extended to 5,000 miles.
