

# Demonstration Tomorrow!

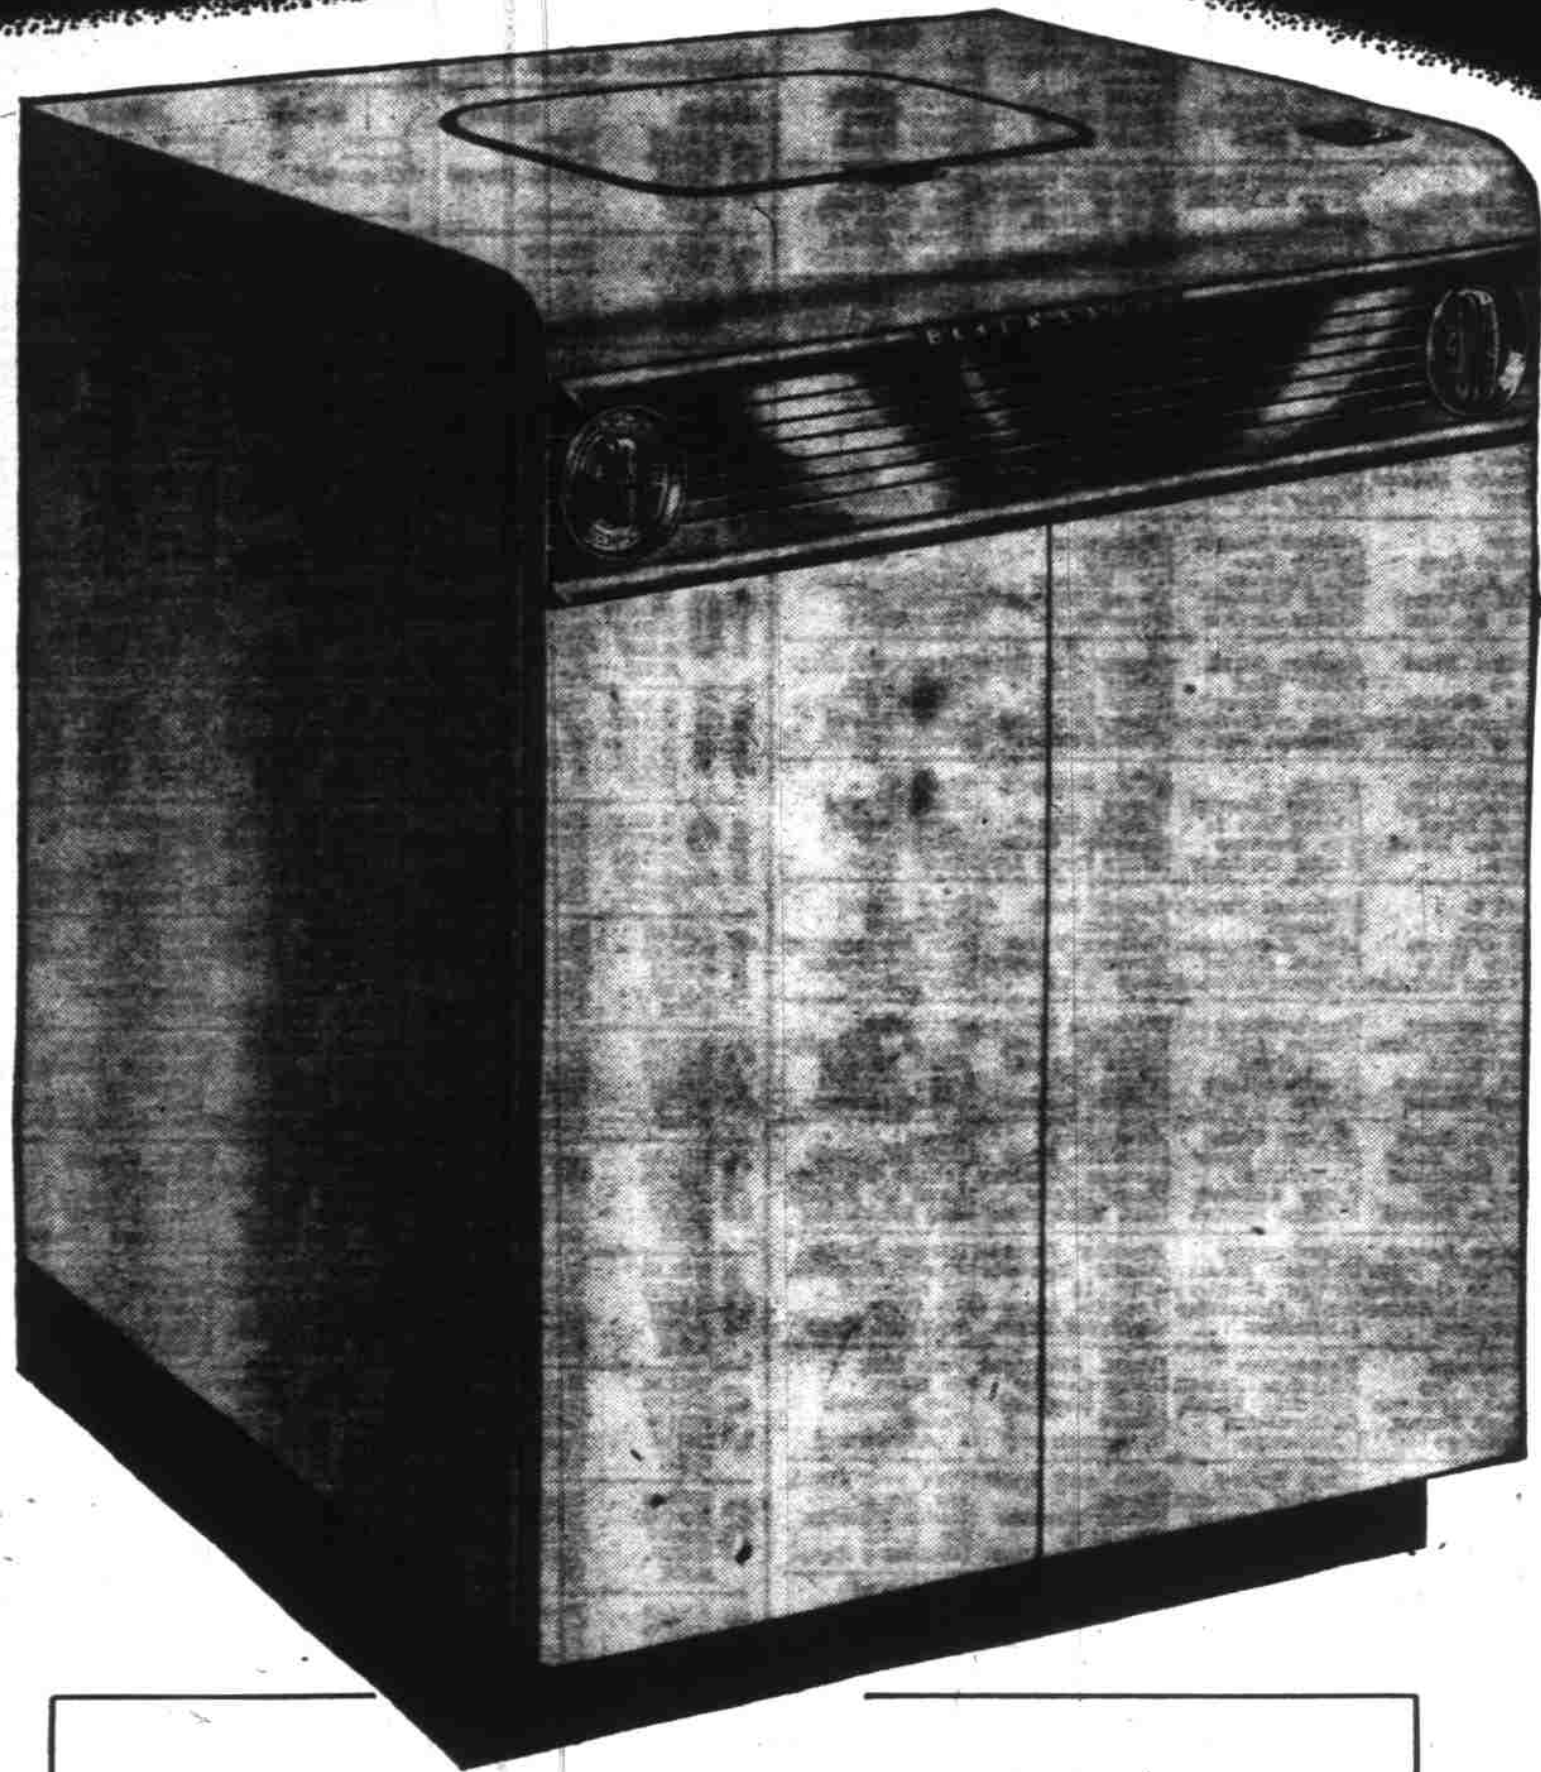

## The BLACKSTONE Automatic

AT VINCES ELECTRIC  
SEE WASHING-DRYING  
DEMONSTRATION-1:30 p.m.

By Mrs. Leila Knight, Home Economist for the  
BLACKSTONE corporation, America's  
OLDEST Washer Manufacturer.

Mrs. Leila Knight

### Blackstone Automatic Washer

The ultimate in modern home laundry equipment . . . designed to be used alone or as one of the three matching units which comprise the Blackstone Combination Laundry. This unit is standard kitchen counter height and depth and can be installed anywhere in the home without floor bolts or special foundations. It washes, rinses, damp dries—automatically—and employs the accepted agitator washing principle. Its automatic cycle is controlled by a positive mechanical timer that can be set for any washing time (2½ minutes to 15 minutes depending on the clothes being washed). A manual water control will permit any desired water temperature needed.

**NO BOLTING DOWN  
NO VIBRATION . . .**

INSTALL *anywhere* IN OWNED OR RENTED HOME

### Blackstone Automatic Dryer

A fast, efficient fully-automatic laundry dryer designed to match the Blackstone Automatic washer. Has selective drying control, automatic heat control to avoid scorching. Combines radiant heat and circulating currents of sterilized air. Dries automatically to "ironing dryness" or "complete dryness."

In 1874, nearly three-quarters of a century ago, Blackstone began building washing machines. Back of each and every Blackstone is the greatest wealth of washer-building experience in the industry. This is why you can expect more of BLACKSTONE. This is why you'll want to see the new Blackstone in actual operation tomorrow.

#### Really WASHES!

The BLACKSTONE is an AGITATOR WASHER! It uses the same proven, efficient, gentle washing action universally approved in the wringer washers! You can be certain that your clothes will be spotlessly washed, unharmed and free of knots and tangles! It really washes clothes clean!

#### Really RINSES!

Only BLACKSTONE offers a scum-removing, double-action, agitated-flush rinse! After the tub automatically refills for rinsing, a complete change of clean water is introduced. As the agitator loosens dirt and soap scum which floats to the surface, a high velocity spray flushes this scum from the top of the tub before the water is drained out, so it cannot be redeposited in the clean clothes! It really rinses!

#### Really SPIN DRIES!

The BLACKSTONE tub develops such powerful centrifugal force — due to its size and speed of rotation — that most clothes are dried so efficiently they can be ironed at once! It can never twist or strain or tear the fabrics — nor break buckles or buttons! The swift, harmless centrifugal action of the BLACKSTONE really spin dries!

Bring 9 pounds of your own laundry and have it washed and dried **free** in the BLACKSTONE Automatic Washer and Dryer!
