Its Only Master is the Person at Its Wheel!

White sidewall tires available at additional cost.

The 1949 CADILLAC, powered by its great new V-type, high-compression engine—knows no counterpart for over-all brilliance of performance.

From the standpoint of ability, smoothness and quickness of acceleration—it is a never-ending challenge to the imagination. Yet, in the hands of the person at its wheel, the 1949 Cadillac is as docile as a kitten!

Never before has a car so dynamic been under such certain and easy control. The big, powerful hydraulic brakes are completely dominant—yet they are as soft to the pedal as sponge rubber. A touch from the daintiest foot—and the car settles down to a quick and

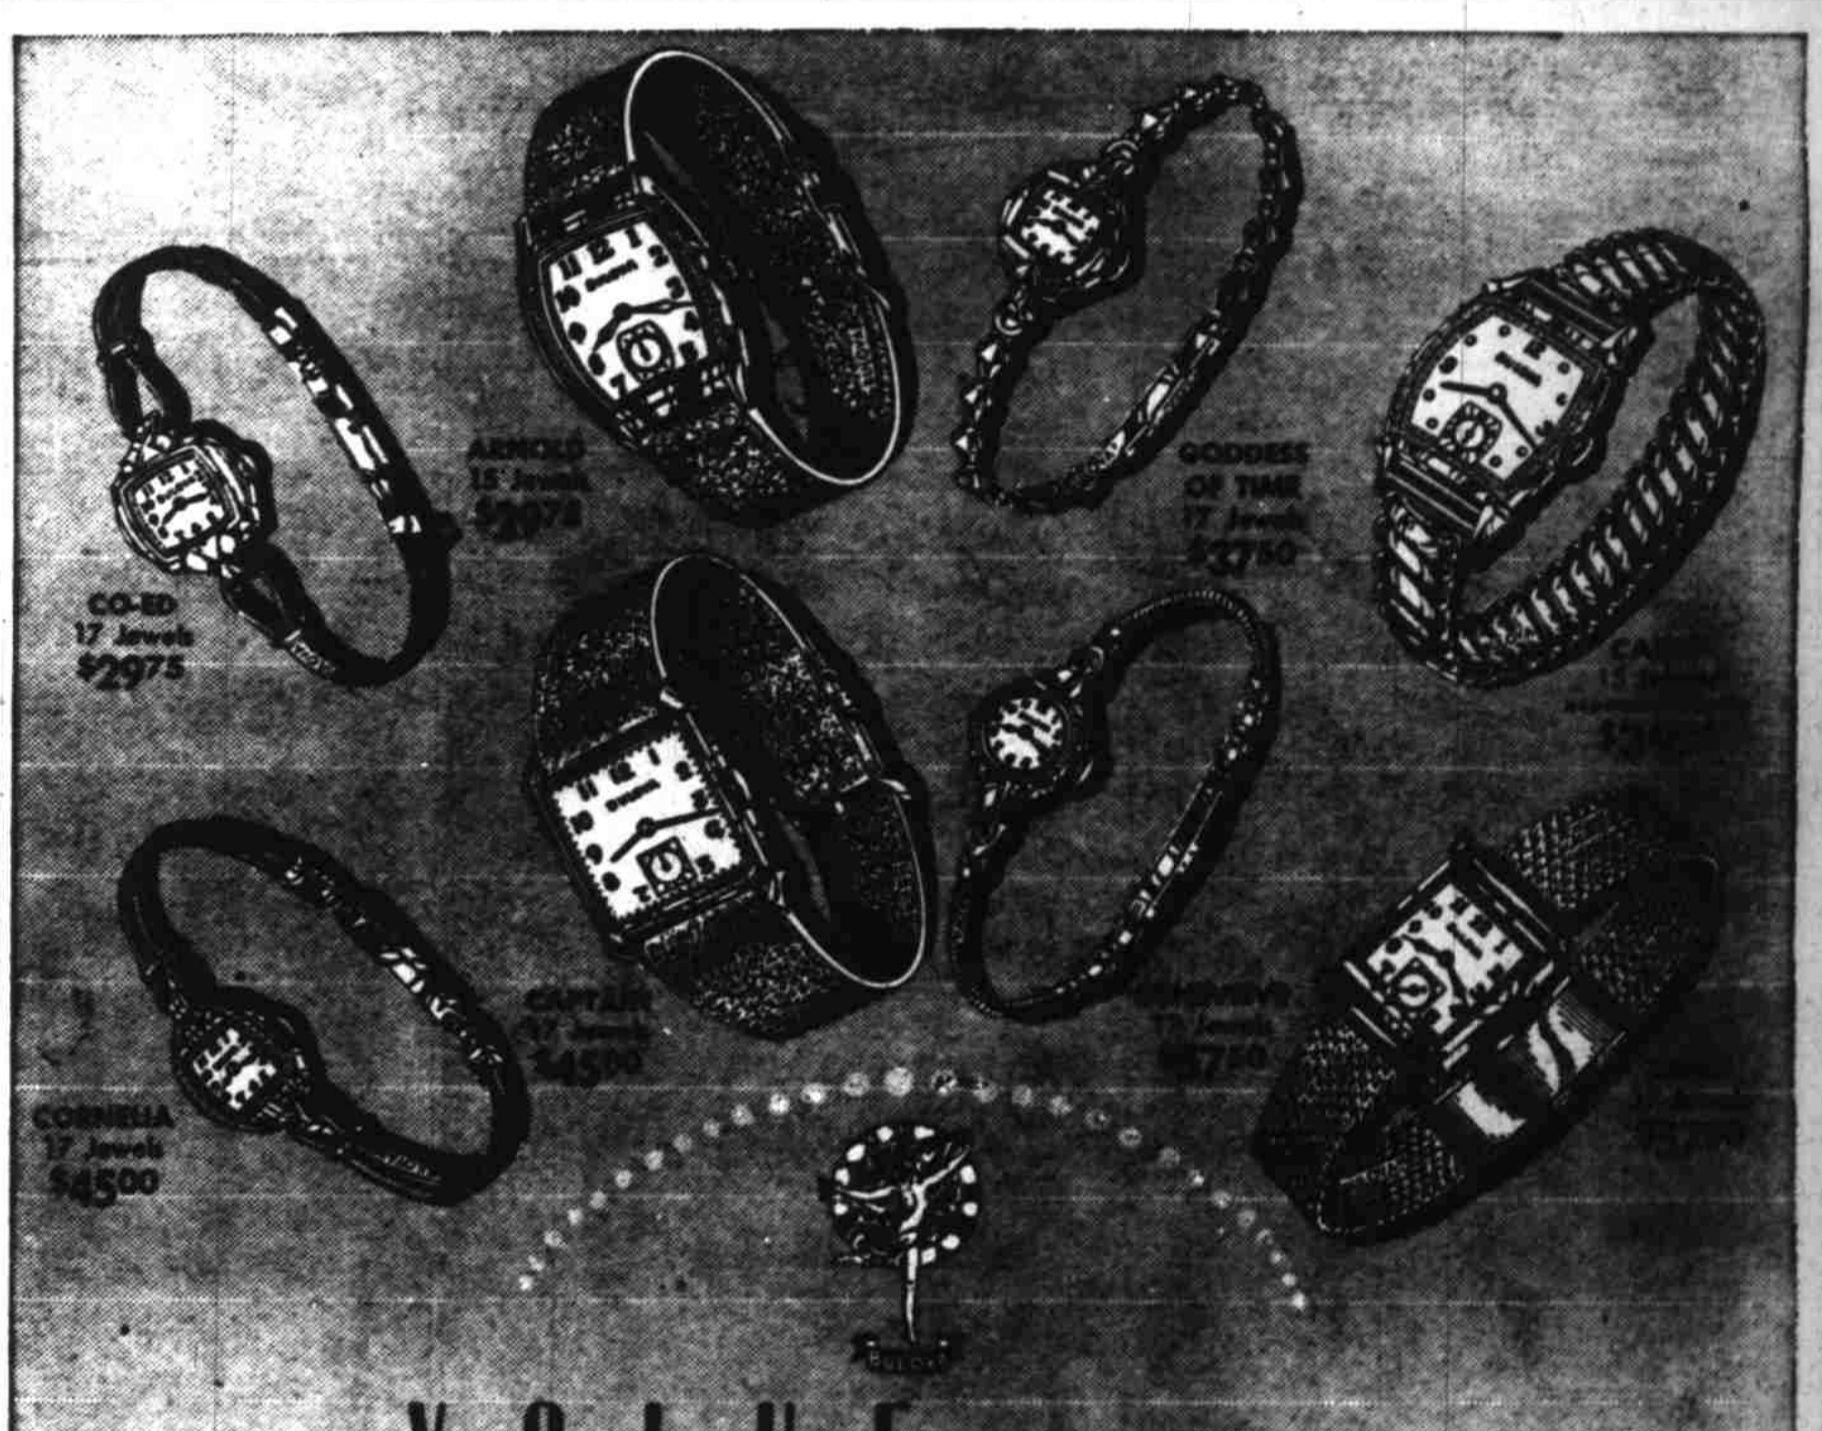

easy stop. A touch on the accelerator, and it moves quickly into any position its driver wishes to occupy. The big, slender steering wheel is feather-light in the hand—and quick and positive in its action.

Yes, the driver is boss in a Cadillac—and his word is unquestioned!

It's a great thrill to take command of such a car—as hundreds are learning every day. Why not come in and see for yourself? Regardless of the price class from which you expect your next car to come, you ought to be familiar with Cadillac. It is the final yardstick for measuring motor cars.
