## Your Health

Each year more people are living to reach the "old age bracket" and, at times, these elderly persons suffer from improper circulation of the blood through the arteries in the legs. Many times such patients are advised by well-meaning friends or relatives to stay off their feet and are told that nothing can be done for them. However, doctors know that there is much that can be accomplished for these persons.

According to Dr. Samuels, in all

can be accomplished for these persons.

According to Dr. Samuels, in all such cases the patient should be forbidden to use tobacco entirely but should be encouraged to use alsoholic beverages in moderation, since they have an excellent effect in dilating or relaxing the blood vessels.

According to Dr. Samuels, in all climate help him?

Answer: Some persons with have fever and asthma do better in a warm, dry climate. However, the best thing to do is to attempt to determine the substances to which the child is allergic or oversettsitive, and then to avoid contact with them, or to give injections of gradually-increasing amounts of

When the symptoms produced by gradually-increasing amounts of a circulatory disturbance are slight, certain exercises are valuable. The child. patient lies down with his feet raised at an angle of 45 degrees. He remains in this position until the skin turns pale. Then he sits with remains in this position until the skin turns pale. Then he sits with the feet hanging down until the feet become red, and finally he lies on his back for two minutes with his feet on the bed.

This exercise is repeated three or four times before retiring at night.

After these exercises, the patient sits in a tub with water at not sits with the feet hanging down until the RANSEN AVENUE FROM LIBERT ROAD TO DOUGHTON STREET Notice hereby is given that the common council of the city of Salem. turbances are encouraged to take plenty of outdoor activity, but are advised to wear long, woolen un-derwear in cold weather.

Treatment with disthermy, that is, electrical treatment which produces heat deep in the tissues, has been found helpful in some cases. The drug known as papaverine seems to be effective in certain instances, but, of course, drugs should only be taken under the doctor's direction.

If there is pain in the legs at night, which gradually increases, it means that the arterial disorder is becoming wosse, and complete
