BOWL MIXING TRICK SAVES TIME — SAVES MONEY

Just as it saves time and work to double the cake or cookie recipe and store the extra in the refrigerator for later use, it saves time and money to bowl-mix two or more pounds of NUCOA at once instead of just one pound at a time.

Since housewives are using more and more NUCOA in cooking, baking, frying, seasoning, as well as a spread for bread, this bowl-mixing trick is worth heeding. It is suggested that the colored NUCOA be placed in a glass covered dish in the refrigerator or cooler and then it's ready when needed.

By bowl-mixing NUCOA you get a smooth even color with no streaks. The finished colored product can be shaped to suit the individual needs. You can mold NUCOA into balls, pats, or any shape desired. You will also have the right color, as all or part of the color wafers can be used to get just the color you want.

Quantity purchases of NUCOA mean savings. Retail merchants usually have a lower resale price on purchases of two pounds or more.

Richness in flavor, which NUCOA gives to cakes, cookies, and other baked products, is one reason many are using NUCOA more and more in baking. A favorite cake is this, made by the regular creaming method.

TWO-EGG CAKE

1/2 cup NUCOA 1 1/4 cups all-purpose flour 1/4 teaspoon salt
1 cup sugar 3 teaspoons single action or 2 eggs
1 teaspoon vanilla 2 teaspoons double action
2 cups cake flour or baking powder 1/4 cup milk

Cream NUCOA, add sugar and vanilla and cream until smooth and blended. Sift flour, measure and sift with baking powder and salt 3 times. Add about 1/2 of flour to NUCOA mixture. Add eggs, 1 at a time beating well after each addition. Add rest of flour in thirds, alternating with milk, added half at a time. Bake in 2 NUCOA-d pans in moderate oven, 350° for about 25 minutes.
