## Now Is The Time FOR FISH & FOWL

### Fish, Fowl on This Month's Plentiful List

NEW YORK -(INS)- Reversing the traditional "fish nor fowl" expression, the U. S. department of agriculture says both fish and fowl will be among the foods generously available to the nation's shoppers during July.

In announcing its July plentiful foods list, the department pointed out that these monthly selections represent commonly used and generally available foods that usually offer good returns on the food dollar.

This reprint from the Oregon Statesman is another proof that fish and fowl is the best budget bet of the month. Serve both often.
