**New Gadgets for Small Homes Prove Convenient, Popular**

By Mrs. Genevieve Smith  
**NEW TOWEL RACK IDEA** that is beginning to appear in department stores is attached by a center clamp instead of the two at the ends. This is not only easier to attach to the wall, but it enables you to slip the towels over the two free arms. You will have your choice of several lengths.

**AUTOMATIC HAMPER** is now in many stores from one of the well known quality manufacturers. Especially convenient for the apartment or small home dweller is the style designed to be attached to a door — of bathroom, bedroom, and/or kitchen. The new convenience is the gadget that opens, locks, and closes the hamper automatically at a finger touch on the latches. With the idea of encouraging use in various rooms of the home, these hampers come in a good assort-

ment of colors that tie in with the most-used room colors.  
**A PLACE FOR HOUSEHOLD TOOLS** is being provided by one ingenious manufacturer for sale through hardware stores and departments. This is a plastic wall case which houses those most-used items — a hammer, pair of pliers, two screw drivers (how often you need that small one!), a small can of lubricating oil, and a measuring tape. There is also a drawer for oddments such as picture wire, tacks, nails and the like. The over-all size is 8 inches wide by 14 inches high.

This case comes equipped. If as a veteran homemaker you are already pretty well supplied but poorly organized, consider the possibilities of a large compartment tray designed for kitchen cutlery. Nails, tacks, picture hangers and the like can be stored conveniently in small glass containers, such as those used for baby foods or salad dressings. This tray can be taken to the job at hand, to provide everything within reach.
