# Designing Woman

BY ELIZABETH HILLYER

HOW OLD IS A CHAIR?

Would you guess that this chair was made more than fifty years ago, or that it's fresh from the factory in 1950? You should be right if you tag it brand new because the rubber uphoistered seat, posture back, pale mahogany and open arm light look are certainly more typical of our times than the Gibson girl's. Actually it is being made by a leading manu-facturer of contemporary furniture who is showing it for spring right along with the most advanced new designs. But the new chair is an exact copy of one that was originally shown at the Dresden Exhibition in 1899, a real startler then by a leader of the Art Nouveau movement in Central Europe. Every design looks new at some time, but most of by Miss Mary Lou Weissenfels them become old hat before long. Nothing looks worse to us today than the ugly "modernistic" furniture that is only 25 years old. it takes to look new still on its 51st birthday.

The surest way to keep your home out-of-date is to keep it in year-be-fore-yesterday colors. Send today for Elizabeth Hillyer's booklet COLOR SCHEMES FOR EVERY ROOM and learn how to choose a color scheme ond how to make it work. Address Miss Hillyer at this newspaper and enclose 15c in coin, please, with a stamped, self-addressed envelope. (Copyright 1950 by John F. Dille Co.)

For a floor, according to the expert, such a cut should be further diluted on the basis of half and half - equal parts of any good brand of sheland alcohol. A minimum of two coats is needed for a good floor finish. Three are better, When diluted very thin with alcohol, there is a certain amount of penetration, with the result that an extremely hard finish is formed. Of course, each coat should be thoroughly dry before the next is applied. Complete directions are always on the container - follow them, and if in doubt add more alcohol, is the expert's advice. Keep the floor waxed with a good paste wax.
