West States Wool Contest Sets Opening

Approximately \$15,000 in college scholarships, savings bonds and valuable merchandise will be awarded in the 1950 "Make It Yourself With Wool" home sewing eontest, sponsored by the Wool Bureau, Inc. and the Women's auxiliary of the National Wool Growers association. The contest consecutive year in 12 western states. opens this month for its fourth

The contest, designed to promote skill and fashion knowledge in making coats, suits and dresses of virgin wool fabrics, is open to all girls from 14 through 22 years of age living in California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, South Dakota, Texas, Utah, Washington and Wyoming, and other western states which may qualify later in the

A national fashion show, held the first week in December in confunction with the 86th annual con-Growers association in Casper, Wyo., will terminate the contest. During the show, all top-ranking state winners will model their own nome-created fashions in competition for national awards. Prizes will be awarded by a judging panel of fashion and home sewing experts.

National awards offered in this

year's contest include: Grand prize for best garment in all divisions of senior class - \$300 scholarship by Forstmann Woolen company. Grand prize for best garment in

all divisions of junior class — \$300 scholarship by Pendleton Woolen

School of Fashion scholarship for best national entry garment made from an original design — \$450 scholarship for one year's tuition at the Traphagen School of Fashion, New York, New York, awarded by the Traphagen School.

Junior class (includes girls from 14 through 17 years of age) — Best coat — \$100 Savings Bond by Milridge Woolen Co., Inc.; best dress — a Singer Featherweight portable sewing machine by Singer Sewing Machine Co.; best suit — \$100 Savings Bond by Milridge Woolen

Co., Inc.
Senior class (includes girls from 18 through 22 years of age) — best suit — \$100 savings bond by John Walther Fabrics, Inc.; best dress—\$100 savings bond by Botany Mills, Inc.; best coat — a singer Mahog-any Console sewing machine by Singer Sewing Machine Co.
Original design class includes all garments made from original de-

signs. It is open to all contestants from the ages of 14 through 22. second prize — \$100 savings bond by the Wool Bureau, Inc.

Savings bonds, cash and other swards will be presented in local, area and state contests. In addition, state winners will receive wool fabric lengths awarded by Botany Mills, Inc., John Walther Fabrics, Inc., and Milridge Woolen

Co., Inc. The wool bureau this year is effering \$225 in "bonus prizes" to contestants writing the best 300word statement on sewing with

Louie Hennies, pictured here, is a busy man. Tonight he will pre-side at the Marion county Live-stock association dinner at Un-ion Hill. As soon as he is through with that he will shift his at-tention to the Marion County Fat Lamb show where he is a director and as his special little project will direct the state sheep dog trials in June. (Farm photo for The Statesman.)

Marion County Fat Lamb Show Plans Being Announced

Karl Wipper of Cloverdale has been re-elected president of the Marion County Fat Lamb show to be held the first Saturday in June. Wipper, Louie Hennies and Bob Hunsacker have been named for three-year terms on the executive board of the Lamb Show corporation which conducts the event. The state sheep dog trials, held in connection with the show, will

be directed by Hennies. Carl Booth will have charge of the fleece and wool display. Lamb entries and exhibits will be cared for by M.

A new ruling limits fat lamb competition to grade sheep. Pure-

As illustrated here, lighting specialists recommend that a 256-watt R-40 type reflector bulb be suspended at a comfortable height, yet high enough so that straw will not catch fire as a simple and easy way to provide warmth for young animals.

Through Use

Infra-red heat lamps installed in the pig brooder will pay big dividends in getting hogs to market while prices are at their peak. The heat lamp used over the farrowing pen will keep the sow

comfortable before she farrows, prevents smothering or chilling, and discourages cannibalism, which frequently causes heavy losses in each litter.

Whether you use a commercial or homemade brooder, be sure that it is sturdy enough so that the sow can't knock it down. Many state agricultural colleges and experiment stations offer detailed instructions on how to construct various styled brooders, three of which are illustrated in the sketches at the bottom of the photograph In addition to using heat lamps in pig, chicken and lamb brooders. many farmers depend on this convenient source of quick heat for drying newborn livestock.

Exchange Value

The exchange value of farm products has declined about five per cent during the past year, according to the weekly farm price, crops and weather review prepared by the Oregon State college extension service from USDA reports and other data.

The government index of prices

received by farmers dropped seven per cent during the 12 months period ending February 15, while farmers costs prices declined only 2 per cent.
For the second consecutive

month, however, the index of prices received by farmers advanced 2 points. On February 15, this index stood at 237 per cent of the 1910-1914 level. Higher prices for meat animals and cotton were mainly responsible for the rise. Truck crops, dairy products and eggs weakened from mid-January to mid-February.

Somewhat lower prices for feed clothing and farm supplies lowered the parity index 1 point during the month. This index, which includes prices paid by farmers, taxes, interest and wage rates, now stands at 248 per cent of the 1910-1914 level.

As a result of the higher price index and lower parity index, the purchasing power of farm products rose slightly, but, as a whole, they are still below parity. The parity ratio stood at 96 on February 15. That was up 2 points from January 15, but 5 points below mid-February 1949.

Honey Producers Are Awaiting Supports

The market for honey continued unsettled during the last half of February. Many producers and dealers were marking time until the effects of the price support program could be determined. No details on the program have been announced but the parity price for extracted honey at mid-January was calculateed to have been 16.5 cents a pound.

The average received by United States beekeepers for the 1949 crop is estimated at 11.3 cents a pound for all grades and methods of sale. The 1949 Agricultural act authorizes support on the 1950 crop at 60 to 90 per cent of parity, which, as given previously, was 16.5 cents at mid-January. During the first part of March, dark am-ber honey in the Pacific northwest was moving to bottlers at 8 to 8% cents a pound in large lots. Intermountain white clover was 9 to 91/2 cents while midwest white clover was bringing mostly 9 to 10 cents a pound.

Dusting Co-op Elects New 1950 Officers

The board of directors of the Polk County Dusting Cooperative were commended at the recent annual meeting for the excellent work done in the 1949 dusting program. The board of directors was given a vote of confidence for 1950 and recommended that they proceed immediately with the dusting cooperative pool for the dusting of hairy vetch and Austrian peas. At the board meeting following the annual meeting, Charles Ross was re-elected president, and John Dickinson, Independence, secre-

Report of the board of directors stated that the cost of dusting last year was \$2.48 per acre net cost to the grower. This was a reduction of almost \$1.00 from the previous year. President Ross stated trade. Most of the seed harvested that this cost was down for a numis expected to find a market for ber of reasons: 1, A lower cost of dust; 2, a lower priced contract with the flying companies; 3, the cutting of administrative expense ed the Willamette valley climate by the board of directors serving was too dry for white clover, par- in the area in which they were located in Polk county. The total of 9,978 acres were
