### Weather News Pushes Grain Prices Upward

CHICAGO, April 4 (AP)—All deliveries of oats and two deliveries of corn, May and July, hit new seasonal highs at today's board of trade session. Wheat pushed upward around 3 cents at times, largely on unfavorable weather news.

The government weekly weather report said seeding of feed grains was being delayed because of too much moisture on one hand, and on the other, not enough moisture had developed in the dry winter wheat section.

In addition to the weather there was some export news and the result was wheat closed 1 1/4 to 2 1/4 higher, corn was 1 1/4 to 1 1/2 higher, oats were 1 1/4 to 2 1/4 higher, rye was 1 1/4 to 1 1/2 higher, soybeans were 1 1/4 to 1 1/2 higher and lard was 2 cents higher to 3 cents a hundredweight lower.

Prices were bid up in the wheat pit on weather reports. The five day forecast said there would be no worthwhile moisture in the dry sections of Texas and Oklahoma.

The five day weather outlook was not encouraging for farmers. Temperatures are expected to be below normal and moisture will average about 1/2 inch in eastern Missouri to one-tenth in Nebraska. No moisture was promised for the extreme western section of the winter wheat country.

### Selling Wave Takes Starch Out of Stocks

NEW YORK, April 4 (AP)—A last-minute wavelet of selling took the starch out of the stock market today.

The market ended higher but by a slim margin. Selling was particularly aggressive in the radio-television group which ended with losses running to nearly 2 points. Changes generally were limited to less than a point.

Traders started the day with a rush and maintained a fast clip through the day. Sales of 2,010,000 shares compared with 1,570,000 Monday.

The market showed a tendency to advance from the outset. Gains were labored, though, and many stocks did no more than see-saw in a narrow groove. Aircraft issues emerged with small gains.

The Associated Press average of 60 stocks advanced .1 of one point to 75.1. A gain among industrials was offset by a decline in the rails. Utilities on average were unchanged.

Trading expanded to include 1,141 individual issues of which 499 were marked up and 381 declined.
