More for Your Money
Unusual colors, novel weaves, and new designs distinguish the carpet now coming on the market. Many of types once reserved for the expensive trade will be available for popular price shoppers.

Latest in color is a high fashion shade in grey—a deep charcoal tone, loomed in solid color and as a background for floral designs. Amethyst, a light pastel violet, is another exclusive carpet tone and forsythia, a mustard yellow, is destined for favor with homemakers.

There are five popular shades in the new floor covering. Green appears to be most popular and grey is important. All shades of beige from pale blond to dark brunette will be seen. The ever pleasant rose, has been augmented by a deeper claret and ruby shades. Blue, particularly the greyed blue, is also returning fast in consumer demand.

Both solid and patterned rugs are being shown in early collections and you can choose one solid, dominant rug, with variations of the color for other rooms in the house.

Combinations of cut and uncut pile have resulted in most interesting effects. The carved or sculptured carpet is one of the high priced items that has been brought within popular range.

Patterned carpets are plentiful and range from traditional florals to hooked rug designs for American Colonial and French Provincial rooms. New textured effects have been achieved by the combination of twist yarn and straight yarn.

In addition to the hard twist carpeting, long a forerunner in popular demand, there are many new deep pile velvets and rugged, nubby twists for those planning decoration or redecoration of their homes.
