

Two marmosets were responsible for their first meeting, so they took the pets along with them on their honeymoon!

THE stargazers are fond of giving helpful hints on the way to handle or hold a woman. They say you shouldn't try to boss an Aries woman. Let her mother you. She is the kind of female who is always saying: "Men are just little boys after all." A Taurus woman likes to be swept off her feet. Don't kiss such a woman gently. Throw your arms about her and kiss her at least six times in quick succession. To entertain her, take her to quaint restaurants. You know, the kind where the head waiter calls you "M'sieur and Madame." Taurus girls like to be flattered. They are the "I Know You're Lying But I Love It" type. Leo women enjoy cooking except when they have to. Leo wives are not such cooking enthusiasts unless they have a cook. Then, on the cook's day off the Leo girl likes to cook a dinner. Virgo women have a weakness for intellectual men. The Virgo girl wants everything just so. She is very critical. Corrects a man's grammar and table manners.

Mind Readers

Experiments were recently conducted to determine how much telepathy or mind reading figured in poker. It was found that some poker players were more telepathic than others. Also that women poker players were more telepathic than men. Keep that in mind. Don't play poker with a woman. Experts on the subject of telepathy also say an astonishing number of women are mind readers in a small way. Have you ever noticed any indications that your wife can read your mind? I have. My wife is quite a mind reader.

Non-Stop Comic

Bob Hope is the world's greatest non-stop comedian. He stays on the stage and keeps the customers continuously entertained more than any comedian in the world. During his recent engagement at the Paramount Theatre, New York, Bob at one performance stayed on the stage one hour and fifty-eight minutes, keeping up a drumfire of gags. The previous record at the Paramount was ninety-one minutes, held by Danny Kaye.

First Meeting

How did the charming young woman who became your wife and you meet for the first time? A Tacoma, Wash., subscriber says that in 1943 she was a singing pianist in a restaurant in New York City. Among the patrons one night she noticed a good-looking fellow who had a marmoset in each coat pocket. A marmoset is a monkey that weighs about six ounces. She asked a waiter to ask the man how

On The Side

'Tis said women poker players are more telepathic than men. So, be careful, mister.

When you kiss a Taurus woman, say the stargazers, kiss her six times in succession!

Copyright, 1950, King Features Syndicate, Inc.

he happened to have the marmosets with him. The man said he was in the Merchant Marine and acquired the monkeys in Brazil. Because of her query the sailor became interested in the singing pianist. After a short courtship they were married, went on their honeymoon and took the marmosets with them. They first went to Los Angeles to live and after that to Tacoma.

Twins

Who are the country's youngest twin grandmothers? Can any pair of twins challenge the claim to that title of Mrs. Grace Finch and Mrs. Marie Keller of Menlo Park, California? Mrs. Finch and Mrs. Keller are beautiful blondes, and both are models in San Francisco. They are thirty-eight years old. I mentioned them before. That was a couple of years ago, when they were thirty-six-year-old grandmothers. Since then they have been blessed with additional grandchildren. I have never seen it stated what the grandchildren of these two young and beautiful females call them. It certainly shouldn't be "Grandma." No woman under sixty should be called Grandma.

Checker-Upper

So those Milwaukee fellows think they are great checker-uppers. Well, Brooklyn has some brilliant checker-uppers, too. I have just heard from a Brooklynite who for two years has been checking on the name of Paul Revere's horse. He now states that Revere had no horse of his own; that he borrowed a horse for his famous ride, and that the horse he borrowed had no name.

Literary Note

Less than twenty-five novels written in this country have sold over a million copies and Gene Stratton Porter wrote four of them, namely "Freckles," which sold over two million copies, "Girl of the Limberlost," one million seven hundred thousand, "The Harvester," one million six hundred thousand, and "Laddie," one million five hundred thousand copies. Has any other author anywhere a record like this?
