Designing Woman

ITALIAN MODERN
 More than 300 years ago, the English and the French set the "traditional" furniture styles that we've lived with happily ever since. Today we set our own style, but even now our contemporary furniture is influenced by the best design of other countries. Some actual furniture has been imported from Italy, Sweden, Denmark, Finland and England and designers from all these nations are responsible for furniture that is now being made in the United States. From Italian design ideas particularly comes graceful and sturdy small furniture that suits our way of life and has the look of belonging to us. Here is a brand new example of furniture by an Italian designer, Professor Maurozio Tempestini, which is just going into production in an American factory. It is made of wrought iron, delicately traced, and has heavy glass for the table tops and foam rubber for seat cushions.

More for Your Money Floor Coverings at Summer Market Show Many Designs and Materials

By Sue Gardner
 New soft floor coverings introduced at the summer market openings show much imagination and common sense. Carpet and mat manufacturers are offering smart new designs in wool carpets and rugs, new cotton carpeting, and a collection of carpets from top grade wool blended with laboratory produced fibres.

You will find these new floor coverings in your local stores in the early fall. The chemical or man-made fibre and wool carpets are the newest. They have a frosty appearance which makes them look fresh and crisp. Colors are strong and clear due to the whiteness of the fibre before dyeing. The pile is high and luxurious and its soft velvety

appearance belies its touch and crush resistant finish. The prices are surprisingly moderate in this group.

In the cotton group, the textures are heavier than formerly and you will find both rug size and roll stock in a loop pile shaggy effect and a thick cut pile. The rugs are pre-shrunk and will wash and vacuum easily. The color range is from light pastels to dark decorator shades.

There is an abundance of ranch motifs, thanks to the popularity of ranch houses. Block designs, old tile and flower motifs, and a tree-grain pattern in wood-tones are among the newer designs. High style colors include olive green, clear red, pine green and chocolate brown. A chevron pattern is also new and you will find multicolored effects in well coordinated colors. Spicy tones are new in carpets, and include cinnamon, nutmeg, allspice, ginger and coffee.

On Etiquette

By Roberta Lee

Q. Would it be proper to ask for an invitation to a social affair for a friend who has not been invited?

A. You may do this only if a friend is a guest of yours, and the affair is a large one, not a dinner. Under these conditions, you are privileged to inquire if you may bring another guest.

Q. If a man who is wearing a hat is walking along the corridor of a public building and meets a woman of his acquaintance, is it proper for him to lift his hat in greeting her?

A. It most certainly is.

Q. What is the proper way to eat a club sandwich?

A. It is eaten with a fork after the toast and other ingredients have been broken. In doing this, one uses a knife and fork.
