GREAT NEW CEREAL with the SWEETENIN' ALREADY ON IT!

NO SUGAR NEEDED!

Kellogg's CORN POPS

STACKED HIGH! at your grocer's TODAY!

JUNIOR JURY SAYS: "CORN POPS IS 'IN'!"

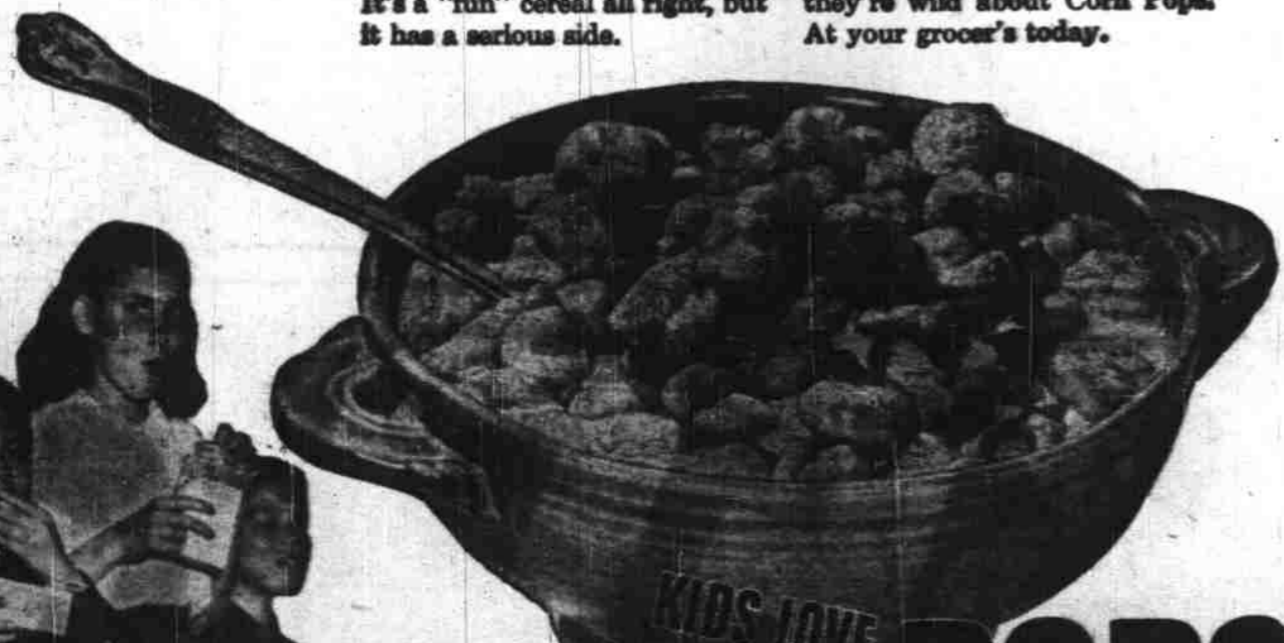

The kids themselves give green light to Kellogg's great new corn cereal

Kellogg's went right to the kids themselves for the verdict on this new kind of cereal that's already sweetened.

They ate it with milk. They ate it without milk. They ate it right out of the box. And they kept right on eating. Which goes to show that kids know what's good for them. Because Corn Pops is far more than fun-in-a-bowl. It's a "fun" cereal all right, but it has a serious side.

Kellogg's Corn Pops is rich in things that growing kids must have. Vitamin D. Energy value. Quickly available food energy. Provides whole-corn values of other important vitamins. Then it's all puffed up into crispy, golden nuggets with the sweetening already on 'em. Isn't that good psychology, Mother? Isn't that the way to get kids to eat what's good for them? Give 'em what they ought to eat the way they want to eat it.

The kids think so. As we said, they're wild about Corn Pops! At your grocer's today.

The jury gobbled up the evidence! They couldn't wait. They ate it in their fingers. They ate it right out of the box. "Pops is tops!" the Junior Jurors yelled. "A sweet-tasting cereal that's good without sugar!" Kellogg's great new corn cereal is in!
