#### FLOWER ARRANGEMENT

Learn how to make this simple flower arrangement and you can repeat it endlessly with great success. Try it with the flowers that bloom in the summer and you'll know what to do with flowers all year 'round — it's a basic design that shows off many kinds. Secret of the arrangement's success is a good start — what you do with the first three stalks of tall flowers makes all the difference. Cut these three stalks carefully in three different lengths. Make sure that the tallest stalk is 1 1/2 to 2 times the length of the flower container. Cut the second stalk to 3/4 the length, and the third stalk to 1/2 the length of the tallest stalk. Affix the three stalks to a pin type flower holder in the position sketched. The rest is largely a matter of filling in with a few large flowers at lower levels, then with extra leaves and perhaps a few more small blooms. Just remember to keep a variety of height and that the arrangement is best with a few flowers. Too many spoil it.

### On Etiquette

By Roberta Lee

Q. Should cocktail glasses be engraved with the wife's or husband's initials? I've been told that all "drinking" glasses are supposed to belong to the man of the house.

A. This is optional. It is appropriate to use the husband's initials on such glasses, and it is also correct to mark the glasses with the wife's initials — to match the rest of the household glassware.

Q. Should small, dry cakes, such as lady fingers or macaroons, be broken as each bite is taken?

A. No. It is better to take small bites out of them.

Q. Is it correct to use "Dear Sir" and "Dear Madam" in social correspondence?

A. No; these terms are used only in business correspondence.

### Adequate Lock for Doors in Home Is a Must; Chain Lock is the Strongest

By Sue Gardner

An adequate lock for the doors in your home is a must for every homeowner. Whether you live in an apartment house or a private home, you like to leave it with the assurance that it will not be easily accessible to prowlers or burglars.

One of the strongest locks, jimmy-proof and secure, has been the chain lock which holds even if the door is forced. However, there is one drawback to this lock that many wives have pointed out to the lock manufacturers. There has been no way of opening the lock from the outside, and if one member of the family is out late, the chain has to be left off, or someone in the family must get out of bed to open the door.

Some friends of mine left their baby with a sitter who did not answer the soft bell they have on the door so as not to wake the baby when it rings. Unable to get in because of the chain lock, the parents finally forced a window open, and found the baby
