Designing Woman

LARGER SQUARE INCHES

Do you know how to plan a small bedroom — so it's as uncrowded and useful and handsome as a big one? To be as uncrowded, the room must contain little furniture. To be as useful, there must be plenty of storage space. And to be as handsome, the furniture there is must be particularly well designed. The best single problem solver for the small bedroom is a Mr. and Mrs. dresser like this. It knows very well how to make square inches do the work of square feet. The top drawers are exactly spaced for ties, gloves, jewelry and accessories. Sliding tambour doors conceal shirt trays on one side and lingerie compartments on the other. Because every inch is used, the single large piece of furniture is more useful than several less efficiently planned small ones, and the single piece means better, smoother arrangement for the room.

On Etiquette

By Roberta Lee

Q. If a sales person has been exceptionally courteous and patient about showing one a display of articles, is it proper to thank him?

A. Yes, and why not? A sincere "thank you" is never out of place.

Q. Who should cut the wedding cake?

A. The bride cuts the first piece. The rest of the cake is then cut by one of her attendants.

Q. What would be a suitable phrase for a wife to use when introducing her husband to another woman?

A. "Mrs. Barnes, may I present my husband?"

Sturdy, Longwearing Luggage Is a Good Investment. Favor Lightweight

By Sue Gardner

This is the time of year when many young people are planning for college, and adults are planning fall vacation trips. The question of luggage is an important one and if you are in the market for a new set or for individual pieces to complete your current collection, the thing to remember is that you want a sturdy, longwearing luggage if you are going to get the most out of your investment.

Very often, you are swayed in your choice by a gay set, without regard to its lasting quality. If you are planning to make many trips, it is better to buy less and buy harder pieces with good plywood and strong construction. A 26" pullman case will take care of a good deal of your wardrobe and when coupled with a small case for the train, you have practically all your needs provided for in two pieces. Learn to pack wisely and eliminate duplication of costumes rather than spreading all you own over many pieces, which will be hard to handle in traveling.

When in doubt about the color of your luggage, choose a neutral shade such as black, brown, grey or beige. Even dark green or blue is fine for background luggage pieces. Then, if you want to add some colorful high style pieces, they will blend with the original ones.

Even if your present trip is not by airplane, it is a good idea to favor lightweight rather than heavy types of luggage. You cannot always have a porter when you want one, and if you can lift and carry the pieces yourself it will be a great convenience. Check the locks on your luggage when you select it—the swing types will be easier to handle as a rule, and also make sure the luggage will not warp or jam when you want to close it. Between trips, if you do not make them often, pieces of luggage will make good storage boxes and will help solve any space problem you may have in your closets.
