## Two Artists Have Designed Modern Dinnerware, Ideal for New Home

By Sue Gardner  
Dinnerware for modern homes has been for the most part in solid china or pottery. In a few cases designers have tried to break up the solid expanse of color by developing a motif or fused texture with various tones, if not different colors for a patterned effect.

This fall, you will see some newly designed modern dinnerware by two artists, Charles Cobble and Anton Refregier, that are refreshing and very much at home in modern homes. Cobble has a witty touch and gives a gay feeling to his patterns which are reminiscent of paintings from the Parisian Latin Quarter. His designs include a French town scene, a carousel theme and a painted desert motif.

Refregier has a more sophisticated style in his dinnerware. He goes in for abstracts in greys and browns, blending them for a contemporary home background. The abstract patterns will also be available in other colors when the dinnerware goes on the market. His sea shell pattern, a modern interpretation of shell shapes, will be shown in rich coral, blue and brown. For a rural touch, he has a green corn design in one set. His Arabian Night and Moby Dick themes are bold and handsome.

The best part of these finely decorated pieces is that they can be used with formal tablecloths as well as informal colored or patterned covers. The prices are moderate and well within the household budget of young couples setting up their first home. (Copyright 1939, General Features Corp.)
