By Maxine Buren

tesman Woman's Editor There's nothing like a good cry they say. Especially in a good

cause. And what better cause, say we, than the inner man, and French onion soup.

Our little home has taken on a definitely onlony odor since deciding to preserve some of our A No. 1 onion crop in the form of soup.

Soup, we recall, is one of our favorite wintertime lunch dishes, and wintertime, we believe, is approaching swiftly, if we can judge from our yen for soup.

So the other night we cried over a dozen or so large, mild onions, simmered them slowly in a lot of luscious and expensive butter. We added seasonings, soup stock (some we've been hoarding in the locker since last spring when we had a beef butchered), and cooked it slowly for awhile.

But, never content to live the simple life, and deciding that when one's up to the neck in soup, one might as well get in up to the ears, we decided on vegetable soup too.

Getting out a supply of carrots we set about concocting another soup-just to make noontime menus more interesting.

We cup up three pounds of carrots, a large head of celery, three or four green peppers, several ears of corn and tomatoes. We cried over more onions, and watched them simmer with the other things.

A little rice was added for body and for spiciness we put in a dash of tobasco, a bay leaf, a smidgeon of soy sauce, a clove of garlic, onion salt, whole black pepper, a tiny hot red pepper, some salt and coarse ground black pepper. Today we have a date with the man at the custom cannery

where we will take our gallons of soup, put them into beautiful shiny cans and have them processed all safe and simple for storing in the pantry. (We always vowed we would have a pantry

when we got ourself a home). Considering the possibilities of freezing the soup, we decided in favor of the canning method because practical for storing and because there's more finality about that way of preserving the soup. It's all ready for eating too, and time's an important element in the business of eating lunches at home.

Soup, soup, beautiful soup, Soup of the evening, beautiful soup.

Yes, Alice, and soup of the daytime, too, for that matter.
