Science Offers New Advice **About Cancer**

NEW YORK - (INS)-Science now offers new preventive and antidotal advice on breast cancera disease which will kill approximately 20,000 American women this year. Four leading cancer authorities

urged women to examine their reasts once a month because 'the reast is the only site of cancer for which the woman herself argely determines her own des-

And a New York designer introduced a new liquid-and-plastic form which assumes the weight, body temperature and resiliency of breast removed through mastec-

The preventive advice was released in a preview of a documen-tary film titled, "breast self-examination." Deaths Decreased

At the showing Dr. Austin V. Deibert, Chief of the National Cancer Institute, said that breast cancer deaths can be "largely eliminated" if women examine themselves once a month. He said:

"Although the breast is one of the most accessible sites, easily examined by physicians and by women themselves, this great advantage is widely neglected because of ignorance or procrastina-

Early liagnosis can be made, he added, if the breast lump is discovered before the disease has spread to other parts of the body. Dr. Alton Ochsner, president of the American Cancer Society, es-timated that "if these cancers were detected early—and they can be— the lives of thousands of Ameri-can the lives of thousands of Ameriwomen could be saved." can women cou Toll May Rise

The woman who examines her own breasts once a month, said another spokesman, can have reasonable assurance that if she finds a tumor that might be cancerous, it will be small in size. And at that stage it is removable with a minimum of risk."

Dr. Deibert emphasized that unless such counter measures are taken, the annual breast cancer death toll will rise from 20,000 in 1950 to 30,000 in 1975-"an increase of 50 per cent in less than a generation.

For women who have already undergone breast amputation, degner Edith Lances showed the therapeutic device for latest bringing a woman back to a psychological norm, from an ap-pearance and comfort standpoint." eplacement Obtained

The new breast replacement consists of an inner and outer cell made of transluscent plastic. The inner cell holds a milky liquid plastic which gives the form a resiliency and softness similar to actual flesh. The outer form molds itself by the pressure of the con-

Bean Market **Prices Soar**

CHICAGO, Oct. 18-(AP)-Processors stepped into the bean market as heavy buyers today and all contracts soared 10 cents, the daily limit.

The sharp upturn in beans had its influence on the rest of the market, which ended firm after pursuing a rather erratic course most of the season. Feed grains lagged at the start. Wheat suffered a sharp but short sinking spell in the last hour.

Wheat closed $\frac{1}{2}$ - $\frac{1}{2}$ higher, corn 1 $\frac{1}{4}$ to 2 cents higher, oats $\frac{1}{2}$ - $\frac{1}{8}$ higher, rye $\frac{1}{6}$ lower to $\frac{1}{6}$ higher, soybeans 10 cents higher and lard 7 to 17 cents a hundred pounds

Soybeans 10 cents higher and lard 7 to 17 cents a hundred pounds higher. Wheat had rather hard going despite its fractional gains. Ru-mors floated around that Italy, which had been expected to buy American wheat, now was not in-terested. Flour sales were said to be the slowest of the crop year. Canadian mills were credited with cutting into the Cuban and Phil-ippine markets. Portland Produce GON STATE GAME COMMISSION WHEREAS, the Oregon State Game Commission at its stated meeting held on July 14, 15, 28, and 29, 1850, respec-tor 16, Chapter 275, Oregon Laws 1941, as amended by Section 4, Chap-ter 16, Oregon Laws 1945, after hear-ings and determinations as to what, if any, wild animals or wild birds may be means or devices, and of what species, quantities or bag limits and in what places, manner and under what regu-ations, and at what seasons or times as will not affect injuriously the supply thereof, and

brassiere to the form well as the movement of that part of the body. The liquid in the pad tends to

coagulate on contact with the outside air. Consequently, if the form is pierced by a sharp object, the liquid itself acts as a self-sealing

agent. Miss Lances pointed out that the form also takes on body temperature almost immediately after it is put into place and is washable.

Man Killed as Logs Crash

McMINNVILLE, Oct. 18-(AP)-Lester Murray, 34, McMinnville, was fatally crushed today when a cold deck of logs on which he was working collapsed at the Engle and Worth Lumber company here.

He was employed as a choken setter by Elton Zuver, logging contractor, R. S. Barclay, company logging superintendent, said. The widow survives.
