## THE STUDY CORNER

How often have you wished that you had a study nook—a miniature library in your home? The new open-stock furniture makes it possible to convert a corner of the living room into just such a useful spot—at the same time add attractiveness and charm to the entire room plan.

This arrangement is adaptable to almost any type room. It is an especially good idea for a long, narrow room.

The extreme length of the living room shown above has been apparently shortened by placing the davenport at right angles with the long wall to form a conversation group. This right-angled position helps set off the corner area which is used for the study group. Flowered draperies have been extended to corner to make small window appear larger. Knee hole desk, book shelves and cabinets

are simple in design—impart a modern feeling to room. Armless lounge chair was chosen to save space, may be pulled over into conversation group when needed. Desk drawers yield plenty of storage space, as do cabinets which flank the book shelves.

Color scheme has been confined to a balanced combination of brown and beige high-lighted by the deft blue drapery florals.

Need some new ideas to sparkle up your home? We have ideas galore and we're here to share them with you. Come in soon and let's talk about your home and the things we can do to improve it.
