Combination Accelerator, Brake Lauded

ZURICH, Switzerland—(AP)—A Swiss traffic policeman has invented a device which, he says, could prevent 80 per cent of all traffic accidents.

Jakob Gossweiler, an inventor who is assigned to the Zurich police department's traffic division as a technical expert, said that if his combination brake and accelerator pedal had been used in the United States the past 50 years 800,000 lives would have been saved.

Under Gossweiler's system of a combined brake and accelerator pedal, one pushes down with his heel to provide more gas and with the ball of his foot to apply the brakes. The foot is, therefore, always in braking position. Furthermore, pressure on the brake pedal automatically cuts off the gasoline so there is no possibility of "stepping on the wrong pedal."
