His and Hers

A well-planned home should reflect the tastes and personalities of both the masculine and feminine members of the household. This is especially true in bedrooms. When we stop and consider that we spend one-third of our lives in our bedrooms certainly our own personal preferences should hold full sway insofar as space permits.

The sketch above reveals a plan for a couple of rugged individualists who share the same room. HE likes a trimly tailored room with he-man furnishings. SHE prefers frill and froth fit for a fairy princess.

A draw-back drapery made of HER pastel-flowered chintz backed by HIS deep-tone crash, forms a partition which divides one room into two. The four-poster bed with frothy canopy, the ornate ruffled curtains and satin slipper chair identify one section as definitely HERS.

The low modern bed in HIS section has crash cover which matches curtains and partition drapery. The well-appointed flat top desk, the king size leather chair and hassock, the modern hanging shelf above the bed give it a thoroughgoing masculine flavor. Walls and floor covering are the same throughout giving a pleasant appearance of decorative unity.

If you're wondering how to give your home a big lift... we can help you. We have decorating ideas galore and their yours for the asking anytime. Hope we'll see you soon.
