For the woman
who hates the sight
of a "comfort" shoe

EMILIE

If you think of shoes as something that must be EITHER comfortable (and therefore horrid) or smart, and therefore to be painfully endured . . . then we have a surprise for you. There are shoes that are BOTH smart and comfortable. You may not believe this, since in reality smart footwear comfort has been so often only a false claim. But we can prove it. A pair of Dickerson shoes properly fitted will be a revelation. Many smart models in all the good shades and materials.
