HOW MUCH UPHOLSTERY DOES A CHAIR NEED?

Comfort can't be bought by the cubic foot. Whether or not a chair is comfortable depends on its fit to the seated figure, the pitch of the back in relation to the angle of the seat and the firmness or softness of the upholstery filling according to the shape of the chair. Extra padding can't make a chair comfortable if these things are wrong, but a smaller chair can be comfortable if these things are right. Trim-lined middleweight lightweight upholstered chairs are fast chasing the heavyweights out of the picture. Today's favorite is lean and well-tailored like these—beside them chairs that haven't worked off their bulges look shapeless and old-fashioned. These three are almost three versions of the same chair, from the fully upholstered to a cane-panelled wood arm to an open wood arm design. They're good example of the new slim and comfortable chairs that are ready for fall, as they were seen in the recent previews of home furnishings fashions to come at Chicago's Merchandise Mart.
