So far 26 employees, ranging from drill crewman to chief engineer, have been so honored by making the "float honor roll." Most of the workers have been with the company at least 30 years.

SERVING AND SEATING
This unusual piece of new furniture tells two furniture fashion stories. One about sofa backs, how they're becoming as important as sofa fronts. Some new sofas ready for fall have cane, spindle or upholstery detail to make their backs notable, and there are new tables to fit against the backs of sofas, too, now that they are so often free-standing instead of ranged against the wall. This sofa by a distinguished Italian architect designer combines the table and the sofa in one piece. Thus it serves a third purpose as a room divider. The second fashion story is in the interesting combination of materials which is also a trend for fall, here metal, wood, marble and glass added to the foam rubber of the seat and back. The frame of the sofa is black wrought iron, its arms are wood, the top tier of the table is Italian marble and the second tier is glass.

On Etiquette

By ROBERTA LEE

Q. Is it really necessary to leave a little food on one's plate. I have been told this is a rule of good manners?

A. This is not only silly, but it is sheer wastefulness. Don't hesitate to eat every bit of food on your plate. This, of course, does not mean that you should "polish" the plate.

Q. For years, I have been sending wedding anniversary cards to a friend. Since last anniversary, however, her husband has passed away. What should I do this year?

A. You can send a card expressing thoughts of friendship, but leave out the word "happy."

Q. When a person to whom you are being introduced says, "I am very pleased to meet you," what should your response be?

A. "Thank you" is sufficient.

Decontrol Said Likely to Bring Rent Increases

WASHINGTON (AP) — More than six million families face a steep hike in rents unless their local governments act soon to preserve controls, rent stabilizer Tighe E. Woods said Sunday.

The government's rent control chief figured the increases would range from 20 per cent on higher priced homes and apartments to 50 or 100 per cent in the lowest brackets.

And that would produce "serious economic shock and hardship," Woods told a reporter.

Past experience will decontrol and the current housing outlook lead to the conclusion, Wood added.

He said he fears that many communities and many tenants will let a Sept. 30 deadline for rent control slip up on them.

Under the new economic controls law, rent controls will die on Sept. 30 except in areas declared to be critical defense housing zones and 2 in communities where local governments specifically request an extension.

A spokesman for realtors promptly disputed Woods' forecast of higher rents. Paul G. Guthrey of Charlotte, N. C., chairman of the Realtors' Washington Committee, warned against "pressure" from Washington to try to get local governments to keep controls.

For several years, Guthrey said in a statement released here, "there have been scare forecasts from Washington of skyrocketing rents, mass evictions and civil commotion if controls are lifted."

"These calamities simply have not happened," he added.

Woods reported there are about 2,300 incorporated communities — not counting critical defense housing areas — under rent control now. Many more unincorporated areas are involved, he said. Altogether, he figured 53 million persons live in rent control communities.

Scientists Plan Mountain Climb

PASADENA, Calif. (AP) — Three mountain-climbing scientists from California Institute of Technology plan a dual-purpose assault this month on the Brooks Range in Alaska.

Making the trips are Professors Gunnar Bergman, Alfred Tisserand and G. W. Beadle. They plan a climb up 10,000-foot Mt. Doonarak, about 100 miles north of the Arctic circle.

They'll take observations of spruce plantings above timberline made in 1939 by Robert Marshall, a pioneer mountain-climber. The three will also make corrections in current Air Force and geological survey topographical maps which have been incorrect in important details of the area.

The hepatica, a wildflower growing from Florida to Nova Scotia, received its name from the Greek "hepar," meaning liver. It was once thought the plant could cure liver diseases, and it is also called "liverleaf" and "liverwort."

Few Signers For 'Declaration'

OMAHA, Neb. (AP) — Omaha World-Herald Reporter Tom Allan took the second paragraph ("We hold these truths to be self-evident," etc.) from the Declaration of Independence, fixed it up in petition for mand asked persons en-

countered at random to sign it. Of 25 persons approached, only four signed. Sample comments: "Sounds sorta Communist. Some of these Communist writers have a way of writing things, you know." "What are you trying to do, overthrow the government?"
