## Don't Look Now...

but... if the roof didn't blow off and the livingroom leak this week, it never will.

**Bird Watcher Notes**... what the juncos and Robins, hanging around in dozens, find in the front yard that's so delectable we'll never know. We've never had so many winter birds.

More nature... Looking across the creek this morning, we saw a little wobbly bit of fluff, bobbing at the top of its lungs. They can't get around very well, but they can always complain about it.

Better judgement... Our eye was attracted to a suspicious character, standing in the doorway of a downtown building. The person, a grandmotherly woman,

peered stealthily up the street, down the street, then holding a paper package under her coat, she dashed to her car and quickly closed the door. Was this a stickup or just a shoplift? No, she feared no law, only friends, for she'd come out of the liquor store, and didn't want her good name sullied.

Which recalls... one time when we saw an elderly acquaintance in the drugstore, whispering something to the clerk. After her "medicine" had been wrapped, we wandered over to the shelf and found that one of the stock of Cubes had been removed. This was in the days when nice ladies didn't smoke, except for asthma, of course... Maxine Buren.

the women with long, white kid gloves... and white ties and collars for the men...

**A PREVIEW**... of spring styles... fashion editors from all parts of the United States are in New York for the advance spring showings... It is straight skirts for daytime wear and for after five and evening the skirts are as full as milady chooses... The greatest change in suits this season are the matchbox jacket suits... the suits are narrower than the standard box and oblong instead of square in shape... and it never flares... in fact, often fits at the hips... these jackets need slender skirts and they have made suits simpler... details are few and far between... suits are now softer, even fitted suits are less drastically fitted, have milder curves... Coats... are full, just a few fitted coats... dresses are pretty and decorative and cut along slender lines... stoles and shawls are everywhere... some matching, others contrasting the ensemble... Formal evening gowns are full length and designed

in anticipation of the inauguration and coronation... the polonaise drapes and panels add a regal look... strapless dresses are on the way out... most have a little something over the shoulder... Accessories play an important role... scarfs and jewelry predominating... linings and blouses matching on suits and coats...

## Put Your Ideas To Work

Decorating is what you make it—a laborious chore, or fun. If you use your own ideas, develop your own working plan, and augment your budget with your own energy, you may even surprise yourself with an end result that's original, professional-looking, economical, and thoroughly satisfying. Just about everyone has ideas, but too many of us lack confidence in developing them.

The first questions to ask yourself before you start are: Is this idea practical? Will it fit in with the general scheme of my home? And, if your budget is cramped (who isn't?), can I save by doing the work myself? If the answers are "yes," you'll undoubtedly have fun going ahead with it.

The room sketched above shows a splendid example of coordinated planning and money-saving ingenuity. Wallpaper that looks like pine paneling has been applied horizontally on just one wall. Other walls have been painted a soft sapphire blue to set off the limed-oak table and ladder-back chairs.

The small, oddly-placed window has been turned into an eye-catcher by making glass opaque and filling it with glass shelves for colorful collection. Limed-oak chest fits snugly below window, doubles for a server.

We like to feel that we have a part in appointing your home for gracious living. So do come in soon and choose the pieces you need from our wide selections of beautiful collection. Limed-oak chest fits your home.
