"Pilot Schools" Subject of Speaker

Legislators are trying to solve the problem of providing "Education for All of Oregon's Children" by presenting a bill during this session to finance "pilot schools" throughout Oregon, schools that could help the mentally retarded child to become socially adequate and to give special guidance to the gifted child.

Miss Joy Hills, an assistant state superintendent of education, discussed this vital problem with members of AAUW at their luncheon meeting Saturday at the American Legion Club. In our system of compulsory education we have placed the responsibility of doing a complete job of teaching upon the schools, she pointed out by gearing the curriculum, as must be done, to the normal child, too many children obtain no benefit from their schooling.

The mentally retarded child is one that has been diagnosed as having so low an intelligence that he cannot profit from the regular school program but under special training could be taught to be self-sustaining. It is estimated, Miss Hills said, that 7% of the school population of Oregon falls in this category and that from 5% of these attend public school now. Others are at Fairview, some kept at home and a few in private schools.

The pilot program of \$114,000 would provide classes for both mentally retarded children and gifted ones, would include special training for their teachers and would provide a diagnostic clinic to determine a mentally retarded child.
