SOUTH BEND, Wash. (# - Now | rate of run-off of precipitation and they're going to measure the size the effect of drop size on soil of raindrops. erosion.

It's a phase of the Weather Bureau research project in which scientists have been studying the ford breed of beef cattle was bred effect of cloud seeding on rainfall.

Machines called raindrop spectrographs have been installed at Olympia, Hoquiam and at Eklund Park, between Raymond and South Bend. They operate by deflecting raindrops into a metal box where they fall on a sheet of sensitized paper which can be developed like a photographic print Edward Charles Clark for a permanent record.
