### Woodsmen in Petrified Forest

Sweigert's cartoon in the San Francisco Chronicle on Friday pretty well summarized the Berlin conference. Its title was "The Petrified Forest." It showed the four negotiators, Dulles, Molotov, Eden and Bidault, as weary woodsmen turning with their tools of axes and sledge and saw, from one tree, labeled "The European Problem" at which they had hacked fruitlessly, to another sturdy trunk labeled "The Asian Problem."

That is what the conferees at Berlin have done. They failed to make the slightest headway toward a solution of the questions of German unification and Austrian independence. In fact Molotov served notice that Russia would yield no ground in either country except on its own terms. In the case of Austria, even when the three western powers agreed to accept some very distasteful conditions insisted on by Russia, such as the continued milking of Austria's petroleum reserves. Molotov threw in another roadblock: no vacation of Austria by Russian troops until the German subject was settled.

Despairing of any progress toward relaxing tensions in Europe the conferees appointed a time and place for a session on Asia, specially peace in Korea and ending of the war in Indochina. Red China will be a participant in this Geneva conference set for April 26th. Governments of Korea and Nationalist China protest this concession in admitting Red China to the conference; but the American position is that this does not constitute recognition, - and anyway our representatives have negotiated with Red China for months at Panmunjom.

Secretary Dulles defends the action and will give his reasons to the Senate and House committees on foreign affairs Monday and a radio-TV report to the country on Wednesday. One may speculate over the decision to join in a conference at Geneva on this wise: Since Arthur Dean broke off the discussions at Panmunjom and refused to return unless the Communists retracted charges of perfidy against the UN command, efforts to get the show back on the road have failed. The calling of the Geneva meeting may have been taken to walk around that issue and get peace talks started. It hardly seems likely that Dean will be a delegate to Geneva. To that degree it may be said that we are appeasing the Reds. However, if Geneva should lead to some settlement (which seems no more probable than for Europe at Berlin), then the price would not appear too high. Another reason may have been to satisfy the French who want to wind up the war in Indochina.

Whatever the reasons, the decision was made. And in late April the diplomats will pack their bags for Geneva, and start working on this second tree in the world's political petrified forest-Asia. At the moment the prospect of felling and bucking it does not appear good.

# Bill Langer, Maverick

The handling of the nomination of Earl Warren for chief justice of the Supreme Court is just Bill Langer all over. He is even more of a maverick than Wayne Morse, both unpredictable and irresponsible, utterly impossible as a coherent and consistent individual. Vesting him with the chairmanship of the Senate judiciary committee is just another of the crimes attributable to the seniority system. Fortunately the guttergaff which Langer made public at the hearing was so fantastic as to defeat the evil purpose of its authors. But what a spectacle Langer makes of his committee and of the Senate to befoul the air with baseless charges against one who has been a public official of high repute and now is vested with the highest judicial office in the land. Warren is a man of even temperament who can bear the humiliation of this ordeal with a minimum of upset. It is well the sub-committee ended the sharpy farce and recommended approval of the Warren nomination. The Langer show isn't anything to get excited over. It will profit nothing to get mad over it. But it isn't at all funny, though we doubt not Langer enjoyed his own performance.

# Land Trade Bill Rejected

The Ellsworth bill to permit lumber companies operating a sustained yield show to get equivalent land from the government when some of its own land was taken over by the government for some public purpose, has been sent back to the House committee by a decisive vote. A number of congressmen spoke in vigorous opposition to the bill, as opening the way for take-over of lands from federal forests in the interest of large timber operators. The referral disposes of the bill for this session.

The Statesman opposed the bill on the ground that it created no more timber, but restricted the quality available for purchase by all competing mills in an area. In cases where some very serious injury is done to a concern or to a community special legislation might be framed for that. Exercise of the right of eminent domain stares every property owner in the face, as farmers who have had to yield good farm land to the highway commission well know. Let the compensation be in cash, not by way of compulsory exchange of lands.

# Ridding the World of Malaria

Malaria, one of the most widely spread and debilitating of diseases is "on its way out" in Asia, according to a statement by Maurice Pate, executive director of the United Nations Children's Fund. He believes that within ten years it will be under guite good control, thanks to the mass health program sponsored by UN bodies like the Children's Fund and World Health Organization. The biggest part of the contributions toward ridding the world of malaria has come from the United States, either through the UN agencies or by direct aid to afflicted countries. Last year some ten million persons were given protection against malaria, chiefly by spraying with DDT to destroy the disease-bearing mosquitoes. The goal this year is 125 million persons.

In this country malaria is a rare disease, but it is remembered as once quite common. Its victims were made dull, listless, were sapped of their energies. In crowded lands like Asia where subsistence is on a thin margin, malaria means in thousands of cases just death by slow stages. If it can be erased there will be more human energy which can be devoted toward earning a living

# TV 'Teacher' Tops Queens of Glamour

By EVE STARR

HOLLYWOOD - "High School Gal Makes Good." By this we mean carrying off the coveted "Emmy" awarded by the Academy of Television Arts and Sciences to Eunice Quedens, otherwise known as Eve Arden (a name inspired by a cos-

> Not bad, in the face of such competition as Lucille Ball, Imogene Coca, Dinah Shore, Loretta Young-all nominees for the best female star of a regular series.

The unchallenged queen of the caustic quip wasn't around when the Emmy's were awarded at the Dinner Dance. Too bad-her little thank you might have been as well worth quoting as Dr. Frank C. Baxter who won two Emmy's, one for

his "Shakespeare on TV," for which in the tradition of acceptance speeches he said, "I should like to thank the author of my material, who unfortunately could not be here this evening, Mr. William Shakespeare."

Eve Arden, really carries the "Miss Brooks" show, but being light and airy, the load's no great strain on her trim, attractive muscles. The play's the better for Eve's I've-seen-it-all-before attitude and makes a very convincing high-school teacher always up to her knees in hot water.

CRITIC'S CORNER: If we must have giveaways, then let's have them like Groucho Marx's "Bet Your Life" on NBC. Here's a real entertainment along with the scattering of cash awards. A sparkle of wit, amusing exchanges, only a dash of the private life of contestants, and this always on the light and pleasant side.

No sordid tear-jerking that sours so many dingy giveaway shows. And commercials subdued, even kidded by Groucho's wiggling eyebrows. This guy's as quick on the mental draw as a Western movie badman with his trusty six-gun. In a flash he twists an offhand harmless remark into an amusing situation, a drab fact into a hilarious joke. That a few of these remarks or situations may be rehearsed is never obvious, this being an "inside" trade secret. We tune in to see and hear him, not his happy cash awards. You can bet your life that millions of others do, too.

STARR FLASHES: Edgar Bergen received a transatlantic telephone message last Tuesday from the King of Sweden at the testimonial dinner given in his honor by the Sweden Club . . . George Burns and Gracie Allen may have just missed the Emmy Award for the best situation comedy, a big disappointment to me and possibly to the National Association for Better Radio and Television, which awarded them a certificate for outstanding comedy program on TV for 1953.

TELEGAS: Eddie Cantor tells Phil Harris, "Ah! This Los Angeles weather! Where else in the world can you wake up and hear the birds cough?"

Bob Cummings has a friend who stopped believing in dreams after he married one. "A good thing about the coffee crisis is that in some restau-

advice. He hesitates to consult other doctors, and the latter may be reluctant to give advice contrary to that of the first physician. There is just no way for the person who is ill, or his family, to tell whether the operation is justified other than by going through examination by other and qualified doctors; and that is expensive business. The advice to select your doctor with care is rather vague when one tries to use it in going down a roster of physicians and surgeons.

According to Williams the scribed disciplines. The medical staff passes on the qualifications of an applicant before he can perform surgery. Full records of each case are required, also actual cases are subject to review by the staff who demonstrates his lack of

accredited) lies not alone in having qualified nurses but also in having all professional work subject to policing by the

medical staff. Even the best of doctors may be mistaken in their diagnosis. But those who are competent and honest make the fewest mistakes. For those who do fall victims to less scrupulous practitioners there is this comfort, that Nature itself is often the best of physicians, so that the unjustified operation is not necessarily fatal, though it is hard Ph. 3-6773 on the pocketbook.

QUESTIONS AND ANSWERS J. P.: How can I prevent re-

peated attacks of kidney stones? Answer: The most common type of kidney stones are caused, in some cases, by urine that is too alkaline. Sometimes the giving of a drug known as ammonium chloride to acidify the urine will prevent the formation of kidney stones. Recently, it has been shown that the use of a drug known as hyaluronidase given Fatigue and tiredness are un under the directions of a physider the control of the part of the cian at frequent intervals may ney stones.

> R. A.: Recently, I had a bullet wound in my leg. I was given gas gangrene antitoxin. Was this necessary in my case?

> Answer: Yes, gas gangrene can wounds and, since this disease is very dangerous, the administra tion of antitoxin is a wise precat tion against this disease.

By W. G. Rogers ALBERT AND VICTORIA, by Francoise de Bemardy, translated from French by Ralph Manheim (Harcourt, Brace; \$4.75)

"We have buried our soverign," Disraeli mourned when the Prince Consort died in 1861 of typhoid. For 40 years more, grief-stricken Victoria had Albert's handkerchief put every day on the sofa in his apartment, his basin filled with water, his watch wound.

No one foresaw his extraordinary success. A German princeling he became not a suitor

ouest, and Palmerston to en-

dure; there was a critical public. there was Baroness Lehzen to ease out. By 1843 Albert was master in his household. It needed him. The Queen's windows, for instance, were washed outside by the Office of Woods and Forests, inside by the Lord Chamberlain, so they were nev-er well cleaned; her fires were laid by one branch of the government, lighted by another, so she was never warm. Albert straightened this out, and performed larger tasks, like dealing with Louis-Phillippe, Napo-leon, Nicholas and Lincoln. Thomas in the midst of nine

method of hospital accreditation provides considerable safeguard to the public. Under the standards of the several professional accrediting organizations those who practice medicine and surgery in a standard hospital must conform to pre-
