## Lumber Safety Rally Slated in Polk County

DALLAS—A county-wide industrial safety conference for the lumbering and logging in this area.

A rally will be held at the Rickreall Grange Hall March 20 to cover the ideas, discussions and experiences coming out of the annual Governor's Safety Conference in Portland.

The idea behind the rally is that, although the annual safety conferences are very effective, the full value of the conferences does not reach the men actually working on the job, it was pointed out by the Polk County group.

With this in mind, it was decided to attempt a miniature conference locally to make available information from the governor's conferences to logging and mill workers here.

Fifteen representatives of labor and management met with representatives of the State Industrial Accident Commission during the past week to work out details of the Rickreall rally.

General chairman will be Roger H. Egan, supervisor of employment at Willamette Valley Lumber Company in Dallas. Co-chairmen of the program committee are George Hewitt, area supervisor for the accident prevention division of the Accident Commission, and Al Martin, Polk County inspector for APD.

Chairman Told  
William Richter, president of Local 2714, AFL Lumber and Sawmill Workers, is chairman of the food and entertainment committee. R. P. Miller, safety director for Long-Bell Lumber Company, is chairman of the committee on displays. Wes Sherman of the Itemizer-Observer will handle publicity.

The accident commission's educational division, which was represented by William Page, will act as coordinator for all phases of the rally and will provide films and other visual aids. Speakers will be present and panel discussions will be conducted for logging and lumbering.

## Collectors to Exhibit Many Items at Show

MONMOUTH—There is growing interest in the Antique and Hobby Show scheduled Friday at the City Hall. At this report, there are no two collections alike.

Among the antiques, and near antiques will be a spoon collection—many of them from Alaska, toothpick holders, a platter 102 years old, a 1,000-eye lamp, a large map of Oregon in 1859, a Bible dictionary of 1830, some very old plates, a powder horn used in past wars, a note written by Mrs. Grover Cleveland and a small brass tea pot.

Among the varied collection items will be old-fashioned model cars, ships, specimens from a rock collection, book collection, salt and pepper collection, wood carving, dolls, agates, water colors, leather tooling, weaving, hooked rugs, china pigs and a collection of ceramics.

The event is being sponsored by the American Legion Auxiliary. The hours are 2-9 p.m.

## 3-Dimension Aids Science

COLUMBUS, Ohio (AP)—Ohio State University researchers are looking for new uses for the 3-D pictures. At present the major application of 3-D to science is in photogrammetry—mapping or surveying with the aid of photographs.

Dr. Bertil P. Hallert, Swedish scientist and associate in OSU's mapping and charting research laboratory, says a 3-D aerial photograph can be used to prepare a detailed map.

The Pennsylvania Turnpike was surveyed in 145 days, compared with an estimated 2½ years using ground measurements.

The method was used by Hitler and later by Allies in World War II. Dr. Hallert estimates there were 80,000 aerial cameras in use by the end of the war.

Dr. Hallert is trying to interest OSU medical researchers in 3-D X-rays as a diagnostic tool. Other fields in which Hallert has noted successful application of 3-D include astronomy, microscopy, engineering, anthropology, geology, psychology, heredity, forestry, agriculture, meteorology, oceanography, botany and archeology.

# ADVERTISING PROMOTES GROWTH

All business... all progress... all growth is essentially a matter of bringing people together: Those who make things and those who use them, those who have things to sell and those who have money to spend, those who can do things and those who want things done.

Quickest, cheapest way to bring together maker and user, seller and buyer, do-er and want-er... is advertising.

Advertising lubricates the wheels of progress... keeps America moving ahead. Gives the manufacturer a larger market. Puts him into mass production. Brings down the cost of whatever he makes. Helps the retailer sell more goods for less money. Advertising helps every business to grow faster... helps everybody to live better!
