

Special Closed Hearing Held By 3 Judges

A special closed hearing which occupied a Marion County Circuit Courtroom most of last week and all day Wednesday was concluded at the close of the day, but results were cloaked under the title—"Confidential."

The hearing reportedly involved an applicant to the bar who qualified scholastically, but was refused admittance by the board of governors on a morals charge. Spectators and the press were refused admittance to the hearing.

In an interview with a Statesman reporter following the close of the proceedings, the three judges impaneled by Chief Justice Earl C. Latourette to hear the case, still refused to comment on the matter. Yamhill County Circuit Judge Arlie Walker, chairman of the panel, said that the findings of the three will be transferred to the State Supreme Court in a confidential report "... in the next few days."

Assisting Judge Walker in the hearing were Marion County Circuit Judge Rex Kimmell and Lane County Circuit Judge William East.

The hearing, said by Judge Walker to be the first of its kind in this area, has resulted in a rather steady stream of witnesses and lawyers into and out of Judge Kimmell's courtroom since its beginning March 8. Justice Latourette explained that the applicant to the bar sought a hearing by the State Supreme Court when he was refused admittance. The three judges were then selected by the Supreme Court.

Secrecy in the handling of the hearing has been explained by Judge Walker as "the best move under the circumstances." As chairman of the panel, he said he felt that publicity would be damaging to the person involved "no matter which way the case goes." He said both plaintiff and defendant stipulated that the session remain closed.

Arraignment Of Teen-Agers Set Friday

Arraignment in Marion County District Court for five of the teen-agers arrested in connection with the Silver Falls auto looting case was continued Wednesday until Friday.

A sixth boy, 17 years of age, has previously been certified over to juvenile court and is being detained in the county juvenile ward.

Held in lieu of \$1,000 bail on a charge of attempted larceny from an auto are Jack Lyman Todd and Dean Stiles, both 19 and of Silverton. Stiles also faces a charge of larceny from an automobile which carries bail of \$1,500.

Also held in lieu of \$1,500 bail are Duane Lemoine Mattox, 18, and Ornono Bryan Shaw, 19, both of Silverton. Held in lieu of \$2,500 bail on a charge of larceny from an auto is Duane Deroy Hug, 18, of Mt. Angel.

Marion County sheriff's deputies estimate that over \$2,500 in cash has been taken from cars parked in the resort area of the falls the past few months. Taken as well have been several personal items including two diamond rings, traveller's checks, purses and clothing. Arrests began when two of the boys were apprehended trying to break into a "planted" car Sunday night. Deputies indicate there will probably be other arrests in the case.

Grandson Of Einstein Sentenced

PITTSBURG, Calif. — Bernard C. Einstein, 23, grandson of scientist Albert Einstein, Wednesday was fined \$100 and put on six months' probation for stealing 80 cents from a vending machine. The sentence was imposed by Justice of the Peace Michael Gatto, who also gave the same penalty to John Edward Marvin Jr., 21, of San Diego, Calif.

Judge Gatto also ordered the young men to pay \$75 for damage to the vending machine. Young Einstein, son of Prof. Hans Albert Einstein of the University of California, received an honorable discharge at nearby Camp Stoneman Jan. 13, the day of the theft.

Young Einstein pleaded guilty Jan. 14, later saying he did so only to avoid publicity. Judge Gatto denied his appeal to change his plea to innocent, and he was sentenced for petty theft.

Demos Doubt Fairness of TV Industry

WASHINGTON — The Democratic National Committee Wednesday questioned the "fairness and impartiality" of the television industry "in its treatment of the two major political parties."

Chairman Stephen A. Mitchell said in a statement the TV networks provided a "virtual dipout" of Tuesday night's Democratic reply to President Eisenhower's tax speech Monday night.

Part of 'Sermon From Science'

Making metal objects float in mid-air is part of the "science magic," demonstrated by George Speake (above) of the Moody Institute of Science nightly this week at Salem High School auditorium. Speake utilizes laboratory and electronic equipment plus colored films to bring the five "Sermons From Science" to Salem.

Fallibility of Human Senses Demonstrated

The fickleness and unreliability of the human senses was demonstrated with a stageful of scientific instruments by Dr. George Speake of the Moody Institute of Science at the Salem High School Wednesday night.

Dr. Speake will appear at the high school this week each night through Saturday at 7:30 o'clock. His "sermons for science" are sponsored locally by the Salem Gospel Crusade and the Christian Business Men's Committee. Tonight his lecture will discuss the possibility of reproducing sounds of past centuries. He will probe the theory of recording permanently voices and even mental images for the future.

By use of whirling discs and drawings Speake demonstrated Wednesday night that, although "God's laws are constant," the human senses are "easily led astray." He demonstrated optical illusions:

In explaining man's discovery of nature's laws, Dr. Speake showed how the law of gravity could be made to produce some peculiar results when another law is "superimposed" on that of gravitation. He showed how, by other tests, the senses of taste and touch and hearing are not always infallible.

"The one thing we can count on," Speake summarized, "is the faithfulness of God. His laws never change—whether they be spiritual or physical laws." The high school auditorium was packed, with many teen-age spectators present. Dr. Speake said each night show will be different. The science sermons are open to the public.

Ship Crushed By Ice, Sinks

ST. JOHNS, Nfld. — The sealing vessel Newfoundland sank in the Gulf of St. Lawrence Wednesday after apparently being crushed by heavy ice. The 65 members of the crew escaped by walking to land over icefields.

BLM Official Transferred to Washington

WASHINGTON — Secretary of the Interior McKay announced Wednesday that William Guernsey, now regional administrator for the Bureau of Land Management (BLM) at Portland, Ore., is being transferred here as an assistant director of the bureau.

A bureau official told a reporter that Guernsey will be in charge of technical activities. The official said he is moving into the post previously held by William Pinus, now on loan to the Hoover Commission on Government Reorganization activities.

The fact that Guernsey was going to be brought to Washington was announced Feb. 12, when McKay established three new areas of offices of the BLM at Portland, Salt Lake City and Denver and abolished six regional offices. Guernsey's new job, however, was not revealed at that time.

Portland Transit Request Favored

PORTLAND — The city's mass transportation franchise committee Wednesday approved a three-point request the Portland Traction Co. said is needed to grant wages and working conditions asked by its employees.

The request, which now will go to the City Council, is for full adult fare for students over 14, an increase from 7 to 10 cents for student 14 and under, and 30-cent 15-minute schedules for some night and Sunday bus runs.

At present, students up to 20 years of age ride for 7-cent fares. A joint communique called for "creation of a more flexible system of trade and payments" throughout the world as a means of raising living standards.

Four cabinet officers from each country took part in the Washington meetings, held to bring U.S.-Canadian economic policies closer together. A second meeting will be held in Ottawa at a time to be announced later.

The conferees agreed that in disposing of farm surpluses both countries would "consult with interested countries" to avoid interfering with those countries' "normal commercial marketing."

They also agreed the U.S. and Canada should concentrate on greater consumption at home, and that any "extraordinary" measures to dispose of surpluses should not replace normal sales of products.

They also agreed the U.S. and Canada should concentrate on greater consumption at home, and that any "extraordinary" measures to dispose of surpluses should not replace normal sales of products.

Young Poison Victim Still Unconscious

HOOD RIVER — Michael Ogden, 6, poisoned by a deadly fruit spray solution four days ago, remained unconscious Wednesday night.

Four-man teams continued to give him constant artificial respiration in a dim hope of saving his life. Hospital attendants said his condition was unchanged. He has been unconscious since last Saturday when he spilled the solution from a bottle he found at an orchard near his home at Odell, south of here.

The chemical was tetraethylpyrophosphate, which penetrates the human skin and paralyzes the respiratory system. It soaked Michael's pants and got on his legs.

The solution, sold commercially as TEPP, is similar to a nerve gas developed during World War II.

Monday a 2-year-old boy was killed and his sister became seriously ill near Turlock, Calif., when they used the chemical to make mud pies.

FRENCH SEEK A-BOMBS PARIS — Defense Minister Rene Pleven told the French National Assembly Wednesday night that France should start preparing its own atomic weapons next year and build atomic-powered ships.

Washington Post Buys Times-Herald

WASHINGTON — The Washington Post purchased the Times-Herald from Col. Robert R. McCormick for an undisclosed sum Wednesday and the first edition of the combined newspapers hit the streets of the capital about 3:45 p. m. (EST).

The new "Washington Post and Times-Herald" will carry most of the features of both publications, it was announced by Eugene Meyer, chairman of the board of the Post, and Philip L. Graham, president and publisher.

Although announcements of the sale did not mention the purchase price, Mrs. Garvin E. Tankersley, a member of the Times-Herald board, said it was announced at a board meeting Monday that an offer of 8 1/2 million dollars had been made.

The Chicago Tribune, of which Col. McCormick is editor and publisher, bought the Times-Herald for 4 1/2 million in 1948.

U.S., Canada Pledge Not to Dump Produce

WASHINGTON — United States and Canadian officials issued a joint pledge Wednesday that the two countries won't upset world markets by dumping their vast stores of surplus farm products.

This was a principal result of a pioneering cabinet-level conference, with U.S. Secretary of State Dulles and Canadian External Affairs Minister Lester B. Pearson heading the delegations.

A joint communique called for "creation of a more flexible system of trade and payments" throughout the world as a means of raising living standards.

Four cabinet officers from each country took part in the Washington meetings, held to bring U.S.-Canadian economic policies closer together. A second meeting will be held in Ottawa at a time to be announced later.

The conferees agreed that in disposing of farm surpluses both countries would "consult with interested countries" to avoid interfering with those countries' "normal commercial marketing."

They also agreed the U.S. and Canada should concentrate on greater consumption at home, and that any "extraordinary" measures to dispose of surpluses should not replace normal sales of products.

Train, Auto Collide on 12th Street

Collision Wednesday night of a westbound auto on Center Street and a northbound freight train on 12th Street resulted in extensive damage to the car, but the train came through the ordeal unscathed.

Arlie Everett Largent, 535 Boone Rd., driver of the car, was treated by Salem First Aid for a cut sustained on his ear.

Largent told investigating city officers that he was starting to make a left turn off Center Street and neither saw the train nor heard the bell. Engineer G. E. Long told officers, briefly, he was "heading north."

The car was bounced off the front of the train rather than dragged any distance. Damage was extensive enough that the auto had to be towed from the scene.

Papal Movie Draws Protest

LONDON — A Protestant religious group protested Wednesday to the British Broadcasting Corp. (BBC) over plans to televise the canonization of Pope Pius X at the Vatican May 29.

"It is a domestic affair of the church of Rome, grounded on an outdated medieval superstition and as such should not be broadcast in a Protestant country," the Protestant Truth Society said.

Atomic Test Victim

TOKYO — Dr. Kentaro Shimizu of Tokyo University examines an unidentified Japanese crewman from the fishing vessel which wandered into the Bikini atomic test area on March 1 and was showered with radioactive ash. Ten of the 23 aboard were hospitalized when vessel returned to Japan as soon as those aboard became aware of the radiation effects. (AP Wirephoto via Radio from Tokyo.)

Hardware Store Sold

Action in Marion County Probate Court Wednesday indicated sale price of the Ray L. Farmer Hardware Co., 2065 Silverton Rd., is \$6,400. Purchaser of the store is Gene R. Walper, 2640 Doughton St.

Private sale of the company was ordered in connection with the Clifford E. Farmer estate. Walper, president of the Shur-Way Company, explained Wednesday that he intends to feature the sale of pumping machinery, irrigation equipment, hardware and sporting goods. Following a complete remodeling of the interior of the building, Walper and three associates will have a grand opening April 2 and 3.

Public Service Forum Group Hears McCoy

Robert McCoy, consultant for the Oregon development commission, was speaker at Wednesday night's meeting of the public service forum.

Speaking on the topic "American Economic Aid to Greece," McCoy outlined the economic development that has taken place in Greece since World War II.

He said that there has been considerable progress toward economic stability and higher standards of living in Greece. He pointed out, however, that there is still much work to be done.

McCoy served with the labor division of the mutual security agency in Greece from October, 1951 to November, 1953. In the capacity of labor relations specialist and as acting deputy director he helped develop labor management relations.

A graduate of Fresno State College and Stanford University, McCoy served for a period as assistant professor of political science at Lewis and Clark College. His present job involves acting as liaison officer between the state unemployment compensation commission and the Oregon development commission.

AF Reserve Center Due In Portland

PORTLAND — A new Air Force reserve center will be activated in the Portland area April 1. Col. John J. Gerrish, commander of the 9600th reserve group at the Air Base here, announced Wednesday.

He said the center probably will be based at the Vancouver, Wash., Barracks.

The center will be for the 9600th group and will be separate from the 488 troop carrier wing at the Portland Air Base.

Activation of the 9600th will enable its members to get pay for their training as do members of the 403d. At present, the 9600th trains on a non-paid voluntary basis.

U.S. Doctors to Treat Victims Of H-Blast

TOKYO — Three U.S. doctors from Hiroshima — A-bomb target in World War I — Wednesday were directed to help treat 23 Japanese fishermen burned by radioactive ashes from an atomic or hydrogen blast in the Pacific.

U.S. Ambassador John M. Allison offered the aid of the doctors, members of the Atomic Bomb Casualty Commission at Hiroshima. Three Japanese doctors on the commission also will come here.

Allison also proposed a joint U.S. Japan investigation of the accident March 1 some 80 miles away from the big blast, which may have come from a hydrogen weapon.

(The State Department in Washington announced that U.S. and Japanese authorities were investigating to determine how such an incident occurred despite "careful precautions". It emphasized that warnings had been given "over a wide area.")

Japanese doctors ordered all 23 of the fishermen back to hospitals. Doctors said the victims' hair was falling out and exposed skin was turning black.

The doctors said some of the fishermen are in serious condition but with long range treatment, including blood transfusions, effects of their burns would not prove fatal.

Whether the Japanese were within the restricted Bikini-Eniwetok atomic proving grounds has not been determined. They said they were not. Allison's proposed investigation would determine that.

Judge Holman To Assist in Marion Court

A full docket and a sick Marion County circuit judge has resulted in appointment of Clackamas County Circuit Judge Ralph M. Holman to assist in the trial docket April 6-30.

Announcement of this appointment was made Wednesday by Chief Justice Earl C. Latourette of the State Supreme Court.

Ill at Salem Memorial Hospital is Marion County Circuit Judge Joseph B. Felton. Circuit Judge Rex Kimmell has required some time off for a physical examination as well as cancelling much of his regularly scheduled cases in view of a special hearing in his courtroom assigned by the Supreme Court. This has left an increasing burden of regular cases in the hands of Circuit Judge George R. Duncan county clerk officials explained.

Mitchell States McCarthy Using 'Hate Campaign'

TROY, N. Y. — Democratic National Chairman Stephen A. Mitchell Wednesday night accused Sen. McCarthy (R-Wis) and his supporters of running a "hate campaign" designed to "convert the fear and hatred that Americans feel for Communism into fear and hatred of other Americans."

In a speech before a St. Patrick's Day dinner here, Mitchell said one of the results was a "revival of religious prejudice" against the Catholic Church.

Mitchell said that "a group of political extremists" was deliberately over-emphasizing the internal Communist menace to their political and business advantage.

"What these extremists are trying to do," he declared, "is to convert the fear and hatred that Americans feel for Communism into a fear and hatred of other Americans."

Salem Police Attend Class

City police attended the first in a series of seven classes of the Advanced Oregon Regional Police School held Wednesday in the City Council chambers.

Topic Wednesday was "Functions Within the State Bureau of Identification and Investigation." Speaker at the two classes during the day was Capt. George A. Kanz, director of the State Identification Bureau in Salem. The classes were conducted from 12:30 to 4 p. m. and from 6 to 9 p. m. in order that all off-duty officers might attend. The series of lectures, each with a different topic, will be held regularly through April 15.

Cancer Group Suspicious Of Cigarettes

SAN FRANCISCO — The American Cancer Society Wednesday night cautiously voiced its "suspicion" that cigaret smoking has something to do with lung cancer.

The society summarized a report by 25 leading U.S. cancer researchers in these words: "Evidence to date justifies the suspicion that cigaret smoking does, to a degree as yet undetermined, increase the likelihood of developing cancer of the lung."

This is the first time the society has taken a stand on the controversial question. Dr. Charles S. Cameron, medical and scientific director of the society, was asked by newsmen what he would advise cigaret smokers to do in view of the pronouncement. He said:

"If you are young and do not smoke, or if you are a beginning smoker without the ingrained habit, do not smoke. "If you are an older, confirmed smoker, smoke in moderation." Asked his idea of moderation, Dr. Cameron, himself a light smoker, said 6 to 8 cigarettes a day.

Dyes Hair Green For St. Patrick

Radar Device Allows for Fast Take-Offs

NEW YORK — Development of airport radar equipment to permit landings and take-offs at a one-minute rate in zero visibility was announced Wednesday.

Edward K. Foster, vice president of Bendix Aviation Corp. said more than two dozen cities in the United States and Alaska will be equipped with the new radar under a program worked out by aircraft operators and the Civil Aeronautics Administration.

Foster said the new radar, developed at its Baltimore plant by the Bendix Radio Div., is technically capable of "landing any aircraft equipped for normal instrument flight regardless of visibility," or completely blind.

His announcement said the equipment "will practically eliminate landing delays due to fog and other instrument flight conditions" and will generally expedite traffic at busy airports.

In brief, he said, the new de-accurate and advanced GCA (Ground Controlled Approach) system with operational speed and precision beyond that of any previous equipment.
