

Dust, Spray Time Here, Farmers Told

By LILLIE L. MADSEN
Farm Editor, The Statesman
Dust and spray time is upon us in a big way, county agents were warning Tuesday.
W. Wayne Roberts of Yamhill County, said that pea weevil control time is heading our way, and control of this insect is a must if seed with good germination time is to be obtained at harvest time. Time of the control dust is very important. Insecticide is applied to kill the adult weevils before they lay their eggs on the pods of the developing seeds. Once the eggs are laid on the pods, it is too late to prevent the weevil damage.
The dust should be applied when the first pods are beginning to show on the pea crop. Adult pea weevils are already emerging, Roberts said Tuesday. Good control of this insect can be had only if the dusting is applied thoroughly.

Cherry Fruit Fly
Two cherry fruit fly emergence cages in the Cherry Hill Orchard east of Salem are being watched daily by D. L. Rasmussen, Marion county agent. Rasmussen warns commercial growers and home gardeners that it is still too early to spray for cherry fruit flies because the flies are still in the soil.
Whenever the first fly is trapped in an emergence cage, interested growers will be notified promptly. Rasmussen said. Official notice of cherry fruit fly emergence in the Willamette Valley is telephoned to county extension agents to relay the information at once to the cherry growers in their areas. Newspapers, circular letters, telephone calls, personal contacts and radio all combine to get the information out promptly.
Lead arsenate or methoxychlor will be used by most growers raising cherries for processing. Methoxychlor and rotenone will be used by a few growers who sell fresh cherries.

Strawberry Root Weevil
Rasmussen also warned that bait for strawberry weevils is a "must" for strawberry and mint growers. Adult weevils are now emerging in some strawberry fields.
In addition, strawberry root weevils can be found in certain raspberry plantings and possibly other cane fruits, Rasmussen added. Strawberry root weevils are now rated among the most serious pests of nursery and ornamental plants. They may be found in primroses, camellias, rhododendrons and other plants.
Either a commercial or home-made bait is recommended. Most commercial baits contain some type of fruit waste products such as apple pomace as a carrier for the poison. From 30 to 50 pounds per acre are needed in mature strawberry fields. Bait by placing a small amount alongside the rows of strawberry plants, or in big fields the bait may be broadcast. Broadcasting is actually practical only in mint fields.
Recommendations, too, are to bait around checking stations and storage piles of wooden berry flats during the picking season.

Dixie Solon to Oppose Public Housing Bill

WASHINGTON (AP) — Sen. Maybank (D-SC), long a powerful advocate of low-cost public housing, Tuesday announced he would oppose any new public housing program because of a Supreme Court decision Monday.
The high court refused to review a lower court ruling which held that three Negroes were entitled to admission to a public housing project in San Francisco built for families of Italian extraction. Thus the lower court decision stands.
In a brief statement, Maybank, senior Democrat on the Senate Banking Committee, said:
"I regret that the Supreme Court decision... makes it impossible for me, believing in local government, to support any public housing program."
It was understood Maybank was speaking for most if not all Southern senators in his brief statement. Opposition of Southern Democrats and some Republicans who have been traditionally opposed to public housing could mean defeat for President Eisenhower's public housing program.

The President has asked a four-year, \$5,000 unit a year program. The House refused to vote any public housing in its housing bill. The Senate Banking Committee has tentatively approved a program which would allow Eisenhower to ask Congress for as many as 200,000 units a year.
Amateur radio stations in the United States are limited to 1,000 watts of power output and some stations use as little as 10 watts.
