By LILLIE L. MADSEN  
SILVERTON — Thirty couples and their children along with two visitors attended the annual Jay-C-Ette and Junior Chamber of Commerce picnic Monday night at the Coolidge & McClaine Park at Silverton.

The two guests were Darold Roth, a cousin of Harlan Roth, who is visiting here from Hemmingford, Neb., and Mrs. Warren Walker, mother of Mrs. G. Arrington, who is a guest from Omaha, Neb. Mrs. Walker, after spending a few more days with her son-in-law and daughter, will return home through California.

Arranging the ham dinner for the evening were Mrs. James Ekman, Mrs. Larry Crennel, and Mrs. Harlan Roth.

Both groups will continue their meetings through the summer.

**Mink Auction in Denmark...**

By JETTE HARTMANN

COPENHAGEN (AP) — For the woman who loves mink—and rare is the one who doesn't—this Danish capital turns itself into an international fur city three or four times a year.

Buyers from all over the world flock to the auction tables to bid for raw furs on display, the result of the year's production of Danish mink.

In the last 20 years Denmark has developed perhaps the largest and finest mink crop in Europe and each year in December and January the farmers' organization, "Danish Fur Sales," hold auctions.

The mink is a member of the weasel family whose diet consist mainly of meat and fresh fish with the addition of vitamins. Since Denmark is surrounded by water, fresh fish is always abundant, and the farms scattered out over the country supply fresh meat regularly.

Danish climate is favorable for mink breeding. The cold forces the mink to produce tighter wool for warmth, and rain and wind encourage the development of strong top hairs to protect the underwool.

But climate alone cannot do the whole job—the farmer and his centuries-long experience in farming have done the rest. The Danish farmers have established an experimental farm where feeding stuffs, inheritance studies, size of animals and quality of fur are held under scientific control.

As a result, the mink farmer can produce furs from 100 per cent white through clear sapphire and all the difference mutations to the brown standard mink. The Danish pastel mink has not only retained the lightbrown pastel shading of the wild mink but has also been improved to bring out the coveted bluish tinge in its underwool.

About 2,500 mink farms scattered throughout Denmark produce around 325,000 skins per year.

The working of mink pelts is one of the most difficult processes in the fur trade, for the skin must be stretched lengthwise to accentuate the full beauty of the texture. From the time it arrives at the workshop as untreated fur until it is sent out as the finished product, mink undergoes a treatment which is applied to only a very few types of furs.

LIBERTY—Mrs. Arlie Largent entertained the Ladies Council of the Liberty Christian Church of Christ on Thursday afternoon for a missionary study at her home on Boone Road. Mrs. Stanley McClellan led the devotion and Jean Cunningham, and Gloria Jewell and her daughter, Carol, showed colored slides of their missionary work in Mexico.

Russell Harris and Miss Betty Simpson of Vancouver, B.C., visited in Salem Tuesday as guests of Mr. and Mrs. Albert J. Beckman.

A. You can take a lesson in charm from a child. Don't be afraid to be wide-eyed. Take an enthusiastic interest in everything, be a good listener. There's no need to gush, but express appreciation. A good disposition is an asset.

Q. When a man is accompanying his wife and another woman to some social function, which woman does he assist first with her wraps?

A. He should assist the woman guest first.

Q. If an engagement is broken, should the girl return the gifts she has received at showers?

A. Yes, she should do this as soon as possible.
