### **Hiss and Freedom**

Today Alger Hiss walks out of federal prison a "free man." In the old language of criminology he has "paid his debt to society." But how free wil he be? And are his "credits and debts" now balanced in the popular mind? No, he will not escape his ill fame short of a miracle of exoneration; and the public will speak his name with the connotation it carries as a common noun. Hiss will find obscurity hard to come by, and employment comparable to his past positions impossible.

For years the Hiss case will be a subject of discussion and review. It is not that he became a member of a communist cell as was alleged but that he carried successfully a double role though in a position of prominence and trust; and then stood firm in his denial in the face of evidence quite overwhelming. This is one of the major tragedies of our time, so great in fact that his most intimate associates deemed the charges incredible. No doubt many still have faith in him, strengthened perhaps by the instability of the accusing witness. The pumpkin papers, the dates, the typewriter offered the most convincing proof of his guilt.

Another man convicted of perjury growing out of testimony in the investigation of Communism was feleased this week from the same prison, But in a different manner. William W. Remington suffered a brutal attack and succumbed to the injuries. His wife claims he was set upon by hoodlums in the prison who had been stirred up by all the talk about Communism. Remington was a relatively minor character, and the case against him was not as strong as that against Hiss. But he was convicted on a second trial and was serving a three-year sentence. Death thus closes his career, which like that of Hiss, had been one of promise. Somewhere along the way they made wrong choices which ultimately brought them to shipwreck on the law and public opinion.

Bill Connolly, writing in the S. F. Chronicle's Sporting Green, says "We're stuck with USC, but don't give up." The Big Ten sends its real No. One team, Ohio State, to the Rose Bowl, but there it will meet the Pacific Coast's No. Two team, USC which was trimmed 34-0 last Saturday by UCLA. It's the one-in-two rule which bars the latter, se Bowl entry last year. Perhaps the "don't give up" means that the Trojans might turn in an upset and win the New Year's day game. USC is the only coast team to win in the Rose Bowl since the 1947 pact with the Big Ten.

### Now an EECO

As counter to NATO, the organization to defend the free world from Communist aggression the USSR is said to be organizing some sort of East European Communist Organization. Russia had issued a call for an All-European security conference, but the western powers invited said, "Let's wait until we get our defense treaties ratified." Russia though is going ahead with a conference in Moscow and the invited guests which will attend are its European satellites and Communist China.

This need cause no alarm. The USSR has for HEARING ENT Main POSTPONEMENT dominated these countries since liberating them and setting up its own stooges as rulers in them. There has been no doubt that in any showdown Russia would muster their armies for use in war against the West (though how loyally they would fight for Communism has always been in doubt). What may now be done is to make formal their alliance though already they are tied with the Soviet Union by treaties of mutual assistance and friendship.

One may fear this division between two power blocs; but it exists, and certainly the West is not willing to go soft with the menace of aggressive Communism confronting it. The lineups however are not necessarily a prelude to war, and in the present mood of the powers war is not in early prospect.

### Phrasemaker

Though on the eve of 80, Sir Winston Churchill remains the great phrasemaker. The other day he remarked with a degree of optimism:

"We might even find ourselves in a few years, moving along a broad, smooth causeway to peace and plenty, instead of roaming and peering around the rim of hell."

"Causeway to peace," "rim of hell"-how dramatic the antithesis!

The tab for campaign expenses for Gov. Knight of California who was re-elected, came to just under \$500,000, while his opponent, Richard P. Graves reports expenditures of slightly under \$100,000. U. S. Senator Kuchel's costs ran to just under \$300,000. Seems like a lot of money, but there are some eight million people in California. Politics has got out of the penny ante class, as least.

A researcher now finds that Churchill is a descendant of Charlemagne. We'll venture to say that some day it will seem almost as important to find that someone is a descendant of Churchill.

## **Editorial Comment** FARM WOODLOTS PAY THEIR WAY

Washington county again has the services of a farm forester. He is available for consultation at the county extension office in the basement of the court house on Wednesday. The services of the farm forester are to be shared with Columbia and Yamhill counties.

Any farmer with a woodlot could well check Tt is surpris WILL woodlot has been found to yield in the way of financial return under intelligent and expert management. There are many acres of such woodlot acreage in Washington county which will return more managed as woodlots than cleared for crop land. Also there are many acres which are well adapted to the growing of trees but should never be considered as farm land. A woodlot need not necessarily be as long-term a proposition as many fear. Thinning on a selected basis returns income after a few years and speeds the growth of remaining trees.

#### **REORGANIZING RED CHINA** To the Editor:

I am deeply disappointed in weary and work-worn Cordell the attitude you have taken with Hull, yielded the position of regard to the possible recognisecretary of state to his dynamic tion of Red China. young lieutenant, Edward R.

This disappointment was further aggravated when I read your recent editorial "Creeping Knowlandism." In that editorial you stated that "the real question is not whether to recognize Red China but when and how and under what circumstances and conditions" leaving the implication that we should sooner or later recognize Red China.

It seems to me the consideration of the recognition of Red China is about as sensible as attempting to recognize a rattlesnake as a barnyard pet. They have proven themselves to be ruthless and deadly to any person or any ideology that conflicts with their aggressive cam-

paign. I will take the side of Knowland, a realist, who recognizes a rattler when he sees one and also who definitely lets the American people know his stand. One does not have to read a six column article to attempt to decipher whether he is a 'pro' or a 'con' in the recognition of Red China.

Them's my sentiments. **DENNIS M. BRENNER** 

# Better English

By D. C. WILLIAMS

1. What is wrong with this sentence? "I tasted of the food before sitting myself down." 2. What is the correct pronunciation of "abyss"? 3. Which of these words is misspelled? Defensable, inconceivable, dissoluble, pitiable. 4. What does the word "gratuity" mean?

Answers 1. Omit "of" and "down." 2. Pronounce a-bis, a as in ask unstressed, i as in kiss, accent second syllable. 3. Defensible. 4. A free gift, or donation. "The gratuity was sufficient to make her financially independent."

The Association quotes John Crosby, TV commentator for the N.Y. Herald Tribune, who again brings up the question of whether pathology under any circumstances is suitable for public exhibition. A realistic show built around a diseased woman, one with leukemia, for instance, says Crosby, has been held by a group of New York doctors to be psychologically unsound because every woman would think that there, but for the grace of God, go I. "A young couple looking forward to parenthood would find cold comfort in this unusual and tragic portrayal of the Medic's art," concludes the Maternity Association and hoped that future Medic shows would be improved . . .

And speaking of highway signs a spy notes that signs at the east end of the Marion St. bridge were (are) worse than the by-pass signs were . . . One says Dallas-Independence, another says Albany-Eugene but NONE points to Dayton or Wallace Rd. . . . And during the by-pass hassle a lady called to say that she, too, has long thought that Salem does not have enough signs pointing the city out to travellers. Why, she said, even the callers in San Francisco bus depots don't mention Salem when they spiel out points north. And once, she said, she was out riding and got lost near Amity and, because of the lack of signs, could barely find her way back to Salem . . .

The welcome mat is out for a golden cocker spaniel at the Benny Sanchez home, 2695 Brooks St. Seems the 8months-old, long-tailed, dog, named Taffy was taken or strayed from home last week. The Sanchez household is fond of the puppy and would like him back . . .

President Sets U. S. Course Toward Lasting Peace Through 'Freezing' of Red Position

This advantage is measured,

prototype stage. Or so, at least,

the intelligence people assure

three to five years.

By Joseph & Stewart Alsop WASHINGTON - Again and in recent months, President Eisenhower has reverted to the theme of peace, so that he some-

According to Joseph Alsop those who

should know, this is not propaganda, or politics, or just talk. Ever since the Eniwetok tests, the almost intolerably cruel

facts about the new type of hy-drogen bomb -especially the bomb's terrible radioactive sideeffects - have impressed themselves more and more deeply on the presidents

mind.Thus when Stewart Alsop he says that, "since the invention of nuclear weapons . . . there is no alter-native to peace . . ." he means just what he says.

In other words, like Sir Win-ston Churchill, who reached the same conclusion earlier, the president is now convinced that president is now convinced that some way short of appeasement or surrender must be found to avert the horrors of hydrogen war. Thus, long before French Premier Mendes-France spoke, the president had already de-cided to seek a "meeting at the summit" provided certain essen-tial pre-conditions were met.

The reasoning behind this decision is reportedly about as follows: In the first place—or at least so the intelligence esti-mates reaching the president's desk indicate-this country will have a decisive advantage over the Soviet Union in terms of

not so much in terms of bombs British policy. as in the means of delivering as in the means of delivering bombs. This country has now turned out its 1000th B-47 med-ium range jet bomber, and the very long range B-52 is now at last really beginning to roll off the production lines. The Soviet equivalents—the TU-39s and the TU-37s—are hardly beyond the productore stage. Or so, at least Malenkov's public statement that a nuclear war now means "the end of civilization" has been repeated in private in even stronger terms by other Russians, notably by V. M. Molotov

If the intelligence is correct, the meaning of this three to five year period is interpreted rather simply. During this period, this country can knock the Soviet Union out while the Soviets cannot knock this country out. There are, obviously, two ways to use this period of grace.

the president.

One way is to force a preven-tive showdown while the advantage still rests with us. But, as the president has publicly said, he flatly rules out this course. He reportedly refuses to discuss the possibility of preventive war, even in private, and even on a hypothetical basis. As of today, this country would be badly hurs in a nuclear war,

and our allies probably destroyed. But this is apparently not the chief reason for the presi-dent's refusal to consider preventive war. He finds the mass killing required in a knock-out blow at the Soviet Union pro-foundly morally abhorrent.

The only other rational alternative to a preventive show-down is negotiation. This is the course the president has chosen. As he has been at pains to make clear, he does not believe that communism has changed its essential nature.

Yet intelligence and diplomatic reports have given him some reason to believe that the awful characteristics of the new type of hydrogen bomb-which the

The president hopes for no grandiose settlement, no true peace, but a kind of freezing in **GRIN AND BEAR IT** position, based on the realities of power. "A you-stay-in-your-backyard - and - we'll-stay-in-our

backyard agreement, with mut-ual destruction the penalty for straying," was the way one policy-maker phrased it. The president himself calls what he has in mind a "modus vivendi." A most serious effort to negotiate such a way of living together is thus very likely to be the next act in the world drama. If the effort fails, our policy can be recast while we still retain the nuclear advantage.

So runs the reasoning. There are dozens of difficult questions which could be asked about this reasoning, notably the questions which Sen. Knowland has al-ready asked about the evident dangers of a policy which ac-cepts an "atomic stalemate."

Yet it is impossible not to sympathize with the president, as he wrestles earnestly with the cruel dilemma imposed by the cruel new weapons. "I some-times wonder," wrote Sen. Van-denberg to his pastor, just be-fore he died, " whether the wit of man is competent to deal with this murderous discovery." And the discovery was, after all, very

much less murderous in those days than it is now.
