In a Lifetime Cease Being Startled; New Gadgets Come From Out of This World

By MAXINE BUREN
Statesman Woman's Editor

We used to be surprised by all the new developments for the housewife, marvelling as such new developments as freezers for the home kitchen, automatic washers, stainless steel sinks, clothes dryers and garbage disposal units. All these surprised us.

By the time infra-red cooking came along, we were beginning to be blasé about such trivialities, but a little impressed at that.

Now come new innovations, which we take in our stride, only wishing they might be soon added to other convenient gadgets for making our cooking more effortless. They tell us that electronic ovens will soon be showing up in homes—maybe within a very short while.

In the electronic oven fish fillets will cook in 30 seconds, potatoes will bake in two minutes and a roast will be done before you can set the table for dinner—in 20 minutes.

The oven will cook by microwaves, a tube that looks like a radio tube doing the work. There will be no fumes or soot and if she wants, the housewife can cook dinner right on the plates and take them from the oven with her bare hand, for only the food will cook—not the cook.

Actually "cooking" the hand will be impossible the unit automatically cuts off when the oven door is opened.

Then there is another new device. This one uses soundwaves to wash clothes. A British firm has the patent on this device with which it expects to revolutionize the laundry industry. The soundwaves press the soapy water through the clothes instead of agitating it through. The electrically operated machine produces 6,000 vibrations a minute and dissolves the dirt without moving the clothes, lace, wool and other difficult-to-laundry fabrics will emerge unharmed.

The vibrator is a small inexpensive affair that looks like a spinning top which may be used in sink, basin tub or other vessel. Our Canadian cousins may see these new gadgets before we, for there are some 30,000 on order with one Canadian firm now.

Another new development for us girls though less sensational is a line of matching stainless steel kitchen units that make an entire kitchen. We're familiar with the oven and surface units that go together, but this includes refrigerator, cabinets and base units that open and close by a mere flip of a button. Dishwasher, dryer and everything you need in the kitchen matches.

Not until they invent a gadget that will cook your food and serve it by merely thinking about it, will we ever be surprised again.

Hawaii Theme Of Sorority Dance

Many members and their guests attended the informal dance held by Eta Chapter of Beta Sigma Phi at the Knight of Columbus hall on Saturday. Grass skirts, sarongs and gay Hawaiian shirts were featured among the many costumes carrying out the "Hawaiian Holiday" theme. Mr. and Mrs. Jack Gartz won the prize for the cleverest costumes.

Palm trees, fish nets and island hats were used for decorations about the room. A late buffet was served. The buffet table was decorated with a miniature volcanic scene, tropical plants, Japanese floats and a typical Hawaiian village scene.

Leis were presented to all the guests on their arrival. Mrs. Alvin Russell, chairman, Mrs. Donna Sawyer, Mrs. Bill Kelson, Mrs. Keith Crane and Mrs. Gordon Davidson were among those on the social committee in charge of the dance.

Duo-Recital Event Of Tonight

Sonata recital by Willis Gate, violinist, and Josef Schmelker, pianist tonight on the Willamette campus will include three important works. The concert will be held in the College of Music Recital Hall at 8:15 tonight. The public is invited to attend.

The Duo Concertant, only Stravinsky violin-piano work was completed a year after his concerto for violin. The Duo Concertant is in five movements, which in no way parallel the classic concept of the violin-piano sonata.

The Mozart Sonata in A Major, K. 526, in three movements, is an example of Mozart's mature writing for violin and piano.

The Faure Sonata, Opus 13, is an example of French romantic style in traditional four-movement sonata pattern. The third movement—allegro vivace—has long been a favorite often played as an encore.
