Soviet Still Acts Friendly Despite Malenkov's Ouster

By TOM WHITNEY Associated Press Foreign Staff Writer

EORGI MALENKOV was ousted as Soviet premier and Nikolai Bulganin put in I his place over a month ago but so far there are no signs of big changes in Soviet breign policy. It's apparent that for the present the Kremlin wishes to continue to appear friendly and conciliatory to the West.

When Malenkov was thrown out of his job on Feb. 8 there were many predictions in the West that this signaled the adoption of a much more belligerent attitude.
