

Youthful Motorists Test Driving Skill

This was the toughest section of Sunday's Teen-Age Road-E-O tests held in Salem. Technique called for driving the two left hand wheels between two precariously mounted rubber balls spaced 1 1/2 inches apart. Test demanded both forward and backup driving. Here one driver faces the real and psychological problem shown from a ground-level view. Inset at lower right is Doug Adams, 16, 4090 N. River Rd., who won first place in the five-phase competition. (Statesman Photo).

Soapbox Ace Takes Teen-Age Road-E-O

Doug Adams, who piloted a soapbox racer to victory in the 1953 derby here, proved just as effective behind the wheel of a regular auto Sunday in winning the Teen-Age Safe Driving Road-E-O.

Adams, coming up 17 in July, scored 466 out of a possible 500 points in the five-phase test to win handsily over a field of some 50 young contestants. His prize for the effort was a set of nylon tires valued at \$125.

Elephant, Man Die in Texas Truck Crash

DALLAS, Texas (AP)—A four-ton elephant landed on a 30-year-old man and crushed him to death when a trailer-truck jumped a ditch and overturned north of here Sunday.

Norman E. Joseph of Newark, N. J., was killed. The truck driver, W. C. Hendricks, 36, of Atlanta, Ga., was injured.

Another fatality was Queenie, an 8,145-pound elephant. Hendricks said both the truck and Queenie were owned by the T. J. Tidwell Shows and Carnival of Big Springs, Tex.

Hendricks said the truck overturned after the brakes failed. Sheriff's Deputy H. G. Vayette said Joseph was riding in the cab with Hendricks and jumped out when he saw they were going to turn over.

"He landed in the path of the trailer and the elephant broke through the siding and landed right on top of him," Vayette said.

Mystery Blast Shatters Mailbox Near Portland

PORTLAND (AP)—A blast of undetermined origin shattered the rural mailbox near the home of Harold C. Pearson early Sunday.

The battered mailbox was noted by a patrolman at about 4:30 a.m. Neither Pearson nor his neighbors reported hearing the blast.

Detectives said they thought the blast probably was caused by black powder in a bottle, touched off by a slow fuse.

Billy Graham Preaches to Queen, Family in Royal Chapel Services

WINDSOR, England (AP)—U. S. evangelist Billy Graham preached to Queen Elizabeth Monday in a royal chapel. The Duke of Edinburgh, the Queen Mother and Princess Margaret also heard the American minister.

Later Graham and his wife lunched with the Queen.

Graham, obviously affected by the singular honor, told reporters afterward: "I can only say that it was a great privilege to be at Windsor today and that the Queen was very charming and gracious to us."

The sermon to the royal family was a surprise climax to the hand-some evangelist's seven-week Scotland-England crusade, which reaped more than 77,000 "decisions for Christ."

The fact that the 36-year-old North Carolina preacher was invited to conduct a private service

for royalty could not help but lift his prestige—already at a high tide in Britain.

Queen Elizabeth is titular head of the Church of England and "defender of the faith." Graham is an ordained Southern Baptist minister but he has always been at pains to emphasize an interdenominational approach in his crusades.

As is the custom with private royal engagements, spokesmen for the royal family would give no details of Graham's visit to Windsor. Graham's associates, usually willing to provide full information about his appearances, had "no comment."

But it was understood from other sources that Graham took for his text Acts 27:25: "Wherefore, sirs, be of good cheer: For I believe God, that it shall be even as it was told me."

Graham, who was making his first appearance in a royal chapel, spoke for about 25 minutes, a little less time than he ordinarily devotes to sermons at his crusade meetings.

Graham preached in the private chapel at Royal Lodge Windsor, near Windsor Castle, where the Queen and duke are in residence. The Queen and duke drove to Royal Lodge, leaving their children at the castle.

The Queen Mother and Princess Margaret are staying at Royal Lodge, a beautifully landscaped country residence in the rolling plains 20 miles west of London and near the River Thames.

Graham was to leave for Edinburgh Sunday night to attend a general assembly of the Church of Scotland. Next Sunday he will go to Paris to continue his crusade meetings.

Lebanon Youth Dies in Crash; Three Escape

LEBANON (AP)—A 17-year-old Lebanon youth was killed outright Sunday when the car he was driving rolled over several times and burned a half-mile west of here on the Lebanon-Corvallis Highway, state police reported. Three other teen-agers in the car escaped serious injury.

Officers identified the dead youth as Mark O. Chamberlain, who along with his father, Orval Chamberlain, resided with the Olaf Olson family in Lebanon. Linn County Coroner Glenn Huston said the victim suffered fatal head injuries when apparently thrown from his 1941 Buick sedan.

According to police, others riding in the car were Sandra Ray, 15; Frances Nepper, 13; and Marvin Jensen, 17, all of Lebanon. All three were pulled out of the vehicle by passing motorists before flames consumed the car. The trio was taken to Lebanon Hospital for treatment of minor injuries and released.

Officers said they were told that an unidentified motorist cut in sharply on the Buick just before it hit a road shoulder and rolled. The accident occurred about 1:30 p.m.

Funeral arrangements for young Chamberlain are in care of Huston Funeral Home.

Possible Rain On Forecast

Cloudy skies with a chance of light rain is the weather picture for Salem and vicinity this morning, but clearing is expected later today, forecasters predicted.

Temperatures are expected to remain cool with the high today reaching 63.

Weather along the north Oregon coast will be cloudy today with some rain and moderate winds, weathermen said.

AIRLINER DITCHES

CARACAS, Venezuela (AP)—A Venezuelan airliner carrying 13 passengers and a crew of three crashed into the Caribbean Sea near the city of Barcelona Saturday. Fishermen rescued nine passengers, the three crew members and found the body of one Venezuelan girl.

High-Climbing Bear Nearly Nabs Angler

GRAND MARAIS, Minn. (AP)—A snarling, angry bear pursued a fisherman high into a poplar tree Sunday but the man escaped with nothing worse than a bite on his foot.

Four times, the black mother bear climbed the tree trunk in pursuit of Truman Engersol, 22, who had crawled "as high as I could go."

"After I got down," Engersol, recalled later, "I wondered how I had ever climbed that tree—and how I ever stayed up there."

He said he hadn't climbed a tree since he was a child. He estimated that the tree was from 40 to 60 feet high, and that he may have been up in it for an hour or more.

"All Afternoon" "It seemed like all afternoon," he said.

The ordeal came after Engersol neared a trout stream where he had planned to fish. He drove his car on a backwoods road until he could go no further because of the growth of underbrush.

He had walked about a quarter mile when he heard a noise in the woods. Engersol suspected it was a moose and climbed the tree, "the highest one I could see," to investigate.

He spotted the bear about the same time the animal spied Engersol. As the animal approached, Engersol said, "I made tracks, climbing up into the tree as fast as I could go."

The bear circled the tree several times before making her first ascent. Holding onto branches with all her legs, the bear lunged forward and tore off Engersol's right boot.

Returning to the ground, the bear ambled around a few moments before returning up the tree. This time she ripped off Engersol's shirt and boot and then returned to the ground.

On its final trip up, the animal just looked at Engersol and then went down. It shuffled to a tree about 100 yards away, gathered three cubs that had been left there, and departed.

Engersol remained on his perch another 15 or 20 minutes before climbing down to head for his car. He said he wanted to be as quiet as possible, "but I got up to a trot at times."

Six Stitches The man drove into Grand Marais, where a doctor "took six stitches to close the cut inflicted on his right foot by the bear's teeth."

Afterwards, Engersol remembered that he had left his fishing tackle back at the scene of his afternoon adventure. He said he would go back for it, "but I'll take a rifle along when I do."

Molalla Boy Pond Victim

By THE ASSOCIATED PRESS Three persons were killed in highway accidents and two children drowned in Oregon over the week end as good weather brought out motorists and swimmers.

Ted Sinner, 13, was swept to his death over Stewart Dam on the Crooked River near Prineville Sunday.

Kenneth R. Roberts, 6, son of Mr. and Mrs. Herman Roberts, Molalla, drowned Sunday when he fell, while playing, into a log pond near his home. A number of bystanders saw the accident but rescue efforts failed.

Mark Chamberlain, 17, Lebanon, was killed Sunday when a car overturned and burned 1 1/2 miles west of Lebanon.

Lloyd Nolan, 40, of Portland, died almost instantly after he was struck by a car in suburban Portland Sunday. The driver was not held.

Robert E. Whitaker, 22, of Eugene, was killed Saturday night when his automobile collided with a Southern Pacific freight train west of Eugene.

Geiger Counter Owners Asked to Register With CD

The State Civil Defense Agency wishes to learn the names of all persons in Oregon who own Geiger counters.

The agency is making the survey so that it can determine how many Geiger counters would be available in case of enemy atomic attack. The counters are used to measure "fall-out" of radioactive particles.

Anyone owning one of the devices is asked to send his name, address and type of detection instrument to the medical department, Oregon State Civil defense.

12-Inch Rain Floods Town In Alabama

GENEVA, Ala. (AP)—A cloud-burst dumped an estimated 12 1/2 inches of rain upon Geneva Sunday, sending flood waters through this Southeast Alabama community.

Working in the downpour, National Guardsmen and volunteers flung up sandbag barricades in an effort to keep the surging waters from pouring into homes and offices.

A town official was hospitalized when lightning struck a telephone line while he was trying to muster men to combat the flood.

Mayor Wilbur Pridgen estimated about 50 per cent of the business offices and many residences in this town of about 3,500 population suffered heavy water damage.

Water that had covered floors in the business district receded Sunday night but many residential streets were still inundated.

D. W. Brown, a justice of the peace, was talking by telephone at the National Guard Armory when lightning struck a line nearby. He was knocked unconscious and hospitalized but was released later.

Highways around Geneva were covered in several places. About 12 families were forced to evacuate their homes and have been billeted in the community center.

Marion, Polk Inoculations Start Today

The long-awaited inoculation of Salk polio vaccine for 7,000 youngsters of Marion and Polk Counties gets under way today.

Six schools will serve as bases and receiving shots will be pupils of 17 schools in Marion County and 10 schools in Polk County. The program will continue through the week.

St. Vincent's School will serve as one of today's centers. Its own pupils will be inoculated starting at 9 a.m. and pupils from St. Joseph's will be processed at St. Vincent's at 1 p.m.

Other inoculation scheduling today: Hoover School (center)—Hoover School, 9 a.m.; Pringle, 1 p.m.; Auburn, 1:45.

St. Paul High School (center)—Eldridge, 9 a.m.; Buena Crest, 9 a.m.; St. Paul Parochial, 9:45; St. Paul Public School, 10:45; Clear Lake, 11:30.

Aumsville School (center)—Aumsville, 8:45 a.m.; Jefferson, 9:30 a.m.; Turner, 10:30; Cloverdale, 10:30; Turner 7th Day Adventist, 10:30; Marion, 1 p.m.; North Santiam, 1 p.m.

The Polk County schedule today calls for inoculations this morning at Morrison School at Dallas, with a total of 159 pupils from Morrison, Guthrie and Oakdale schools being processed.

Falls City Grade School will be the site of this afternoon's inoculations. Pupils will be serviced from Falls City, Pedee, Arlie, Wildwood, Bridgeport, Oakhurst and Falls City 7th Day Adventist.

Tide Maroons Eugene Angler

FLORENCE, Ore. (AP)—A Coast-guardman Sunday swam through 100 yards of rough surf to rescue a fisherman who was trapped on a jetty here by the incoming tide.

The fisherman, Will Graneman of Eugene, said he didn't notice the tide was rising until he was marooned on the jetty.

He signaled to shore for help and the Coast-guardman jumped into the surf with a lifejacket and swam back to the beach. The rescuer refused to identify himself.

TRAIN DERAILED KLAMATH FALLS (AP)—Thirteen cars of an 83-car train were thrown into a ditch and demolished Sunday when a Southern Pacific freight train hit a broken rail near Malone, Ore.

This is the time of year when millions of Americans are planning their summer vacations; and of the number a substantial production will try to work in a trip to or through at least one of the great national parks. It is an easy thing to do in these days of good roads, almost universal ownership of automobiles, and regular vacations of two or three weeks for employed workers. Last year, some 48 million persons visited national parks and monuments.

These numbers are straining the facilities of the park system far beyond capacity. Most of the parks were acquired in pre-motor age days, and not enough money has been spent on roads and hotel accommodations to take care of the multitudes which now press annually for admission. A writer in the American Forests says that the sums made available by Congress, some \$30 million a year, "cannot go far in extending or modernizing the system, or pay for enough rangers and supervisory personnel to insure the safety and comfort of tourists and protect the scenery."

The author, Anthony Netboy, goes on to say:

"As a result of congressional failure to provide needed operation and maintenance funds, buildings and grounds in many parks are deteriorating, roads are falling into disrepair, utilities are inadequate and sanitary conditions are sometimes appalling."

He reports that the two most popular parks, Yellowstone and Yosemite "are taking a heavy beating." He is very critical of the limited accommodations.

Start Made to Withdraw U.S. Korea Troops

SEOUL (AP)—The United States has set up a three-service military advisory group here to pave the way for eventual withdrawal of all U. S. forces from Korea, it was learned Sunday.

The organization, still in the provisional stage, has the goal of making South Korea's armed forces "completely self sufficient for defensive purposes," a responsible informant said.

With this mission accomplished, the United States can then plan a complete troop pullout, reliable sources said.

But they acknowledged that any troop removal may be a long time in coming.

There are currently two understrength U. S. divisions serving in the Korean forward areas. They are the 24th and 7th Infantry Divisions. Both are liberally filled with Koreans attached to the U. S. Army.

The prime consideration is: How much of an army, navy and air force can the Republic of Korea economy support now and in the years ahead?

The ROK army is said to consist of 20 divisions.

Quiet Election Expected in British Isles

LONDON (AP)—Britain's 1955 election campaign strolled into the home stretch Sunday. There appeared to be much more interest in the running of the Epsom Derby Wednesday and in a couple of threatened strikes.

"The quietest general election in living memory draws toward its close," said The Sunday Times as the nation prepared to choose a new Parliament Thursday.

Most of the newspaper headlines went to the horse race at Epsom and to rail and port strikes scheduled to start this week.

With only four days to go until the voting, the consensus among British newspapers is that Prime Minister Eden and his Conservatives will win.

ANIMAL CRACKERS BY WARREN GOODRICHT

MEET THE AUTHOR OF "DOG TO ENGLISH" DICTIONARY

"He's making a fortune with his new book!"

WASHINGTON (AP)—The Atomic Energy Commission Sunday proposed rules under which it will give American businessmen confidential or secret information to develop civilian uses of atomic energy.

This is one of the key steps designed to pave the way for expanded use of the atom in private industry, medical treatment and other peaceful pursuits.

It is a followup to the AEC's action last month in laying down regulations under which the AEC will license utilities and private firms to use nuclear materials.

The proposed regulations will be published in The Federal Register. The public will then be given 30 days in which to submit written suggestions and comments.

Encourage Private Groups The rules for licensing and for granting access permits were drawn up under the 1954 atomic energy revision law. One of its chief purposes was to encourage private groups to get into the atomic energy field.

The AEC said the information it will give private individuals or firms will not include that of "primarily" military significance.

Under the regulations, the AEC said, it will not give secret or confidential atomic information to a person who is a citizen of a foreign country or to anyone whom the commission "knows or has reason to believe is owned, controlled or dominated by, or is acting as an agent" for a foreign government or business.

More Strict The proposed rules for granting access to secret information are somewhat stricter than those for giving out confidential information.

An individual would be granted access to confidential data "if he evidenced a potential use or application of such data in his business, profession or trade."

An applicant for secret information would be required to show a need for it, and then would have access to it for a limited time only, and would be restricted to specific information which has "an immediate or significant effect" upon his business, profession or trade.

An "L" security clearance would be required for anyone obtaining confidential information and a "Q" clearance would be required for secret information.

Year Permit Each access permit would be granted for a one year term but could be renewed on application. However the AEC said it may terminate or suspend a permit for such things as "false statements in the application" and violations of the Atomic Energy Act or commission regulations.

Anyone seeking atomic information would be required to pay all expenses involved.

The AEC said it would waive its rights to inventions and discoveries which develop as a result of confidential data provided.

However, the AEC said it would insist on "an irrevocable, royalty-free, non-exclusive license for government" use of any discovery or invention resulting from secret information supplied. A report would have to be made to the AEC on any such invention or discovery.

Waldo Hills Farm Home Guttered by Fire

SILVERTON (AP)—Flames gutted a home Sunday in the Waldo Hills area a few miles from here but neighbors aided in saving most of the furnishings. Owners of the house were reported to be Mr. and Mrs. E. Headricks.

The fire, which broke out about noon, was battled by members of the Silverton Fire Department as well as neighbors. The walls of the house were left standing but the interior was completely destroyed.

It was not known if the loss was covered by insurance.

Firemen said cause of the fire had not been determined. The Headricks family bought the house, known as the Steve Balch place, after moving from Independence last fall.

GALE STRIKES ITALY ROME (AP)—A 60-mile-an-hour gale struck the Adriatic and Ligurian coasts of Italy Sunday, drowning at least five fishermen.

Friendly Enemies, Girl Claims

MINNEAPOLIS, Minn.—Fluffen, a 4-year-old mixture of Persian and Angora cat gets "A" for patience and obedience while a mother white rat (lower left) and her brood of seven enjoy a closeup of what makes an arch enemy tick. Despite the cat's if-I-had-my-way expression it really doesn't mind entertaining the rats, says Marlene Hyquist, 13, of Minneapolis, Minn., owner of the feline and rats. The fellow investigating Fluffen's head appears to be exercising a bit of caution, however. (AP Wirephoto).
