## Deer Scarce In Santiam Canyon Area

Statesman News Service

MEHAMA—Hunting fever seems to be on the decrease in this area. Many persons are opposed to the "either sex" season, because of the seeming scarcity of deer this year.

One hunter described the situation by saying "I don't mind hunting if I think they're just hiding, but when there are no tracks, there are no deer."

The number of deer checked in at Gene's Market at Mehama runs far behind last year's record. Over half of them have come in from east of the mountains.

Unusual number of dead deer found this past winter is blamed for the poor season in this area. Many think the deer were diseased rather than starving.

Elmer Taylor found eight dead deer in a field where his cows were pasturing. Melvin Peck reported finding seven carcasses above Freres mill. Leo Wagner reported 17 dead not far from his strawberry patch.

Hunting reports from over the state seem to differ: Gerald Rockwell who returned from the John Day area saw plenty of deer, mostly buck, Jack Kauffman of Stayton hunted around Baker for three days and saw only three does. A farmer in that area told him he'd "plowed under 40 deer carcasses this spring."
