LOS ANGELES (AP) — Former gambler Mickey Cohen's wife plans to sue him Thursday for divorce, her attorney said.

William Herbert Hall said he was preparing the papers and added that Mrs. Cohen will charge mental cruelty.

Cohen served a term in McNeil Island Penitentiary for income tax evasion.

Cohen is now in the business of growing, selling and renting flowers and plants. Before his imprisonment he was a haberdasher.

He and his wife, Lavonne, were married here Oct. 16, 1940. It was the first marriage for each. They have no children.

The U. S. National Park Service was established in 1916.

SEARS ROEBUCK AND CO. 3 DAY BROADLOOM CARPET SALE!

Tufted carpet

Climate Change Expected as Carbon Dioxide Added to Air

By EDMOND LEBRETON

WASHINGTON (AP)—U. S. scientists want to take a deep look into the ocean to see what man is doing to the air.

Some of them think the slight warming up of the earth's climate in recent years will continue as the burning of more coal and oil puts more and more carbon dioxide gas into the atmosphere.

A House appropriations subcommittee was invited to think about some of the possibilities if this is true: For example, that the Arctic Ocean, freed of much of its ice, may become navigable, giving the Soviet Union a newly useful 2,000-mile coastline and perhaps making it a great maritime nation.

Made Public

The subcommittee made public Wednesday night testimony of Dr. Roger R. Revelle, a specialist in oceanography for the U. S. national committee for the International Geophysical Year.

Revelle said he thinks there is enough to be learned from the sea to justify a \$1,000,000 appropriation for oceanographic work.

Ocean depths, he said, might be

"an ideal place for disposing of nuclear waste." That dangerous trash, he said, will be accumulating at an ever increasing rate as nuclear power is used more and more.

Check on Water

But before using the depths as a trash bin, he said, scientists would have to know "how rapidly this deep water comes up to the surface where the fish live"—otherwise commercial fisheries might be wiped out.

What does the sea have to tell science about carbon dioxide in the air? Revelle explained it this way:

The "fossil fuels"—coal, oil and natural gas—which nature accumulated over millions of years, are being burned up very quickly. Simply by cooking his meals, heating his houses and powering his machines with them man is "making perhaps the greatest geophysical experiment in history." It is one that can't be repeated, because the fuels will be used up in perhaps 100 years.

Add to Carbon Dioxide

This concentrated burning is liberating more carbon dioxide than the world has ever seen in a comparable time: "I would estimate that by the year 2010, we will have added something like 70 per cent of the present atmospheric carbon dioxide to the atmosphere. . . It is like 1,700 billion tons. . . It may, in fact, cause a remarkable change in climate."

The climate change is expected by some because carbon dioxide has a "greenhouse" effect. It lets in heat from the sun, but retards radiation of heat away from the earth.

The big question is, how much carbon dioxide is absorbed by the ocean, how much remains in the air?

Lowest-Priced **MOTOROLA** 21" TV \$219.95

MOTOROLA TV FOR '56

World's Easiest Tuning! World's Easiest Viewing!
Finest 21" Table TV Anywhere!

Extra picture power through new Motorola Power Panel design. Extra convenience—no stooping or stretching to tune it. Eye-Conditioned with Aluminum tube, Eye-Shade filter and deeper, more natural picture. Superb wood-grain Mahogany or Blond. Model 21T28.
