

### Supersonic Wind Tunnel Given Debut

(Picture on Wirephoto Page)  
**CLEVELAND**—The National Advisory Committee for Aeronautics (NACA) Tuesday unveiled a new \$3 million dollar supersonic wind tunnel—the nation's largest—for research on airplane engines of the future.

The tunnel will duplicate, for engines and engine parts as large as five feet in diameter, air speeds from two to 3½ times that of sound—1,200 to 1,800 miles an hour—at altitudes up to 30 miles.

Few current jet aircraft operate above altitudes of about 10 miles, except for brief intervals. The NACA, as the top government agency for research on aircraft and engines, keeps its eyes, however, on requirements for the years ahead rather than on current air operations.

**Flight Propulsion Lab**  
 The new wind tunnel, 10 feet by 10 feet, is a part of the NACA's Lewis Flight Propulsion Laboratory at Cleveland Airport.

The new facility is called the Lewis unitary plan supersonic wind tunnel.

The unitary plan refers to cooperative use with industry and the armed forces.

**Most Powerful**  
 NACA told visitors at the first public inspection of the new facility that the tunnel's 250,000 horsepower electric-motor drive is the most powerful of its kind in the world.

It produces the air speed of up to 3½ times the speed of sound, and unprecedented velocity for tunnels that large.

Dr. Edward R. Sharp, director of the laboratory, said the new tunnel is valuable particularly for work on problems of turbo-jets and ram-jet engines. He said engines and parts as large as five feet in diameter may be studied in the 10-foot square test section.

An even larger super-sonic wind tunnel is under construction at the Air Force Arnold Engineering Development Center at Tullahoma, Tenn., but it will not be completed for a year or more.

The facility here went into operation recently after a "shake-down" of several months.

### Beatification Of Pope XI Near at Hand

**VATICAN CITY**—The Congregation of Rites took a semi-final step Tuesday toward the beatification of Pope Innocent XI, a 17th Century pontiff who was known as "The Father of the Poor."

Meeting with Pope Pius XII in the Vatican Palace, it approved as miracles the reported curing of two Italians—a man and a nun—through intervention of Pope Innocent in 1690, a year after his death.

Vatican sources said Pope Innocent, born Benedetto Odescalchi, probably will be proclaimed among the Roman Catholic Church's blessed at a ceremony Sunday, June 17. Such beatification is regarded as second only to sainthood.

India exports 25 million dollars worth of cashew nuts a year.

### "Paul says I'm a peach!"

Paul thinks it's just wonderful the way I keep our house looking practically perfect and still have time to do so many other things. The plain truth is that I've found faster, easier ways to get my work done. Take wood floors. Cleaning and waxing them was something fierce. I can still remember how my muscles ached for days after. But not now. It's almost a pleasure with Bruce Cleaning Wax. There's no floor washing at all! Bruce cleans and waxes at the same time. And my wood floors really look beautiful. Much nicer than when I did them the hard way. If you have wood floors, you'll really appreciate Bruce Cleaning Wax.

Incidentally, I've found other Bruce floor products help me, too. There's Bruce Floor Cleaner for cleaning and lighter waxing, Bruce Paste Wax, Bruce Asphalt Tile Cleaner, Bruce Asphalt Tile Self-Polishing Wax and the new Bruce Self-Polishing Wax. Yes, for floors it's Bruce!
