

Twining Praises Soviet Air Force

By HERB ALTSCHULL

WIESBADEN, Germany — Gen. Nathan F. Twining, just back from an eight-day Russian visit, told newsmen Monday the Soviets have "a very fine air force."
Twining sidestepped a news conference question as to the relative strength of the U. S. and Soviet air arms, a question which has provoked considerable debate in Washington, but said he was "not surprised" by what he saw.

Near-Collision Rate Seen High In Air Flights

This came when he was asked whether Soviet air power seemed stronger or weaker than he had anticipated.
"I was not surprised," Twining replied. "From what we could see, the Soviets have a fine air force, well equipped and very efficient."
Washington — Inadequate regulation of the nation's crowded airways causes a daily average of four "near-collisions" among airliners, a special government advisory group said early this year.

The finding pointed up Saturday's dual tragedy in flight over Arizona — the wrecking of two giant airliners and loss of 128 lives.

It was the worst disaster in commercial aviation history. The government already has embarked on a five-year program to improve air navigation aids and traffic control facilities. Congress has approved some 40 million dollars of the estimated 246 million dollar cost of the project.

A special eight-man committee headed by William Barclay Harding, New York investment banker, described the collision hazard to airplanes this way:
Dangerous Conditions
"Ever more dangerous conditions in the air can be anticipated unless some urgent action... is taken to provide full-time high-level leadership to the problem of bringing our aviation facilities in line with air traffic growth and the progress being made in aircraft development."

Following the report President Eisenhower named Edward P. Curtis of Rochester, N.Y., as a special assistant to direct a long range study of the nation's aviation facility needs. Curtis is a vice president of Eastman Kodak.
The problems arising from the movement of more and more aircraft at greater and greater speeds have been outlined recently before congressional committees.

C. J. Lowen, head of the Civil Aeronautics Administration, told a congressional group the "number one problem" in aviation is that "air traffic is overloading the system and growing at a rate which exceeds the progress... in expanding the capacity of the system."

Lowen declared "the greatest single problem we face is air-traffic control." "Until we have the capacity to effectively regulate the safe movement of aircraft, required in our national interest, there can be no real assurance of ability to move the existing volume of aircraft safely and reliably."
Officials said the plan to improve air traffic control involves great expansion and improvement in the use of radar, the capacity of the navigational system and the use of air-to-ground communications.

Lowen declared "the greatest single problem we face is air-traffic control." "Until we have the capacity to effectively regulate the safe movement of aircraft, required in our national interest, there can be no real assurance of ability to move the existing volume of aircraft safely and reliably."

Gerlinger Expansion at Dallas Represents \$430,000

DALLAS—Centered in a space equivalent to two city blocks in the industrial district of Dallas is this new machine shop nearing completion for Gerlinger Carrier Company. When finished, it will represent a \$430,000 investment. Building, being constructed by Robert D. Morrow, Salem contractor, will cost \$180,000 while new machine tools to be placed in the completed structure will cost an estimated \$250,000, according to V. O. Williams, general manager of the Gerlinger Company.

Nixon Flies To Philippines

HONOLULU — Vice President Nixon left by plane Sunday night for Manila and a major address he will make there July 4. Asked if the speech might unveil a new economic aid program for Asia, Nixon replied:
"No. The speech is not along those lines. That would come from the White House."
The talk, he added, will be a general review of the Asia picture. Nixon rested here 12 hours after a flight from Los Angeles. He said he saw no trend toward resumption of trade between the United States and Red China and that he did not believe the world tide was running against the free world.

Twins Born to Brooks Couple

BROOKS—Twins — a boy and a girl — were born Sunday morning at Salem General Hospital to Mr. and Mrs. James F. Lindsay of Brooks.

The boy, Dennis James, weighed 6 pounds, 15 ounces, and the girl, Norene Helen, 6 pounds, 6 ounces. The twins have two older brothers, Jack and Peter.

Lindsay is employed as a welder with the Salem Equipment and Supply Co.

McArthur Aide Dies

SAN FRANCISCO — Brig. Gen. Louis W. Maddox, 65, retired, died Sunday at Letterman General Hospital. He was Gen. Douglas MacArthur's finance officer during World War II.

Jack Kearns, who managed Jack Dempsey, believes light heavyweight champion Archie Moore will become the next heavyweight champion.

Installation services will not be held until July 22 because Dr. H. L. Foss, president of the Northwest District of the Evangelical Lutheran Church, could not be present until then. Dr. Foss will install the Rev. Mr. Selig. On the afternoon of installation Sunday, a reception for the Rev. and Mrs. Selig and five children will be held at the church social rooms from 2:30 to 5 p.m. to which the congregation members and all friends are invited.

Mrs. Goode was born at Hillsboro, Nov. 13, 1911. She graduated from Willamette University in Salem and attended the University of Washington and University of Southern California for graduate work.

Survivors in addition to the husband, include two children, Jonathan and Jennifer, both of Albany; and parents, Mrs. Richard Devine of Independence and Orval Wilkes of Tillamook.

Cycling Oldsters Schedule Trip to Keep in Condition

ALMONDBURY, England — Harry Jubb, 72, said Monday he was taking his 70-year-old wife Nellie on a 300-mile bicycle tour to help keep her in condition.

"When a woman reaches 70," he explained, "she begins to feel a bit out of condition. This will be the best holiday we've ever had, and if it doesn't keep Nellie fit, nothing will."
Harry, a cycling enthusiast since 1911, said he and his wife would start their trip on a tandem bicycle, riding through the counties of Yorkshire and Derbyshire.

5-Story Leap Fails, But Not 13-Story One

SAN FRANCISCO — This, police said, is how William Wal Lum Chun died:
Chun, 34, jumped out of his fifth floor room at the YMCA Hotel Sunday.

Badly injured, he climbed to the roof of the 13-story building and jumped again. That time he died.
Police said he left notes telling of ill health.

Here's why...

First National is Oregon's favorite place for savings!

- Quick, friendly service...**
