Foot First

By NATHAN of JOHNSON'S Corner Liberty and Court

Almost every woman has one or more pairs in her wardrobe but it's no secret high-heeled shoes should be worn with discretion. High heels are anything over two inches.

When you wear shoes with three-inch heels, for example, you cannot stand naturally. To keep from falling forward you bend your knees, push your abdomen and pelvis forward, force your shoulders back. This "crooked" posture becomes habitual gradually.

Most common aches in the small of your back, knees and thighs can be traced to this improper posture. It displaces abdominal and pelvic organs from their accustomed positions, shortens calf muscles, forces the body's weight onto the balls of the feet. Some headaches, eye-strain, general body fatigue are the outcome.

Your feet themselves take the worst beating. The foot is not permitted to function normally. The balls of your feet are subject to burning aches, cramps. Every step is jarring because your heels are not allowed to absorb the shock of walking.

Now don't throw away all your high-heeled shoes, don't deny yourself the pleasure that comes from wearing beautiful new styles. There is an intelligent way to enjoy the smartness of high-heeled fashions. Wear them when they should be worn—when you go out in the evening, on special "dress-up" occasions, and so on.

But, during the day—at home, in the office, when shopping or doing a lot of walking and standing—wear low-heeled shoes. There are many attractive styles that give your feet a chance to perform naturally, that help maintain correct posture.

An important reminder: If you've been wearing only high-heeled shoes for a long time, switch to low heels gradually—give your feet a chance to stretch to their original length.
