

# Scientists Tell Ike Nuclear Bomb Tests Should Continue

By ARTHUR EDSON  
DENVER, Oct. 20 (AP)—A group of scientists told President Eisenhower today that "we have no prudent course except to continue the development and testing" of atomic weapons.

Their statement was made public by Eisenhower here as he wound up five days of politicking. Throughout this trip he has pounded hard at Adlai Stevenson's call for a world agreement to end testing of hydrogen bombs.

The scientists made two contentions:

1. That until an international agreement is reached, "with guarantees which protect the American people and the peoples of the free world," the testing must go on.
2. That the harmful radioactive fallout from nuclear explosions is not anywhere near the radioactivity man is exposed to such sources as cosmic rays and the medical use of X-rays.

Revert Political Aspects  
The 12 scientists—including chemists, physicists and industrial engineers—said:

"We regret the injection into a political campaign of statements and conclusions which extend beyond the limits of existing scientific evidence. Such scientific matters of vital importance can only be evaluated by calm deliberations."

So today's statement pitted scientist against scientist as well as political leader against political leader. Earlier this week another group of scientists endorsed the stand Stevenson had taken.

The statement was released as a memorandum to the President from Lewis L. Strauss, chairman of the Atomic Energy Commission.

Into Campaign Fight  
Strauss has been accused by Democratic leaders of getting the commission, which they contend

should be non-political, into the middle of a campaign fight. "With respect to disarmament," the scientist said, "the administration of President Eisenhower has certainly made, and continues to make, the most vigorous efforts to bring about international agreement on a system of disarmament which would eliminate or reduce the production and testing of nuclear weapons."

Presidential news secretary James C. Hagerty said, the scientists submitted the statement voluntarily.

Scientists Listed  
The scientists who signed today's statement included:

Dr. Roger Adams, head of the chemistry department at the University of Illinois; Dr. John Bugher, director of medical education and public health of the Rockefeller Foundation; Dr. John Dunning, dean of engineering at Columbia University; Dr. G. F. Fair, director of the Radiological Research Laboratory at Columbia University; Dr. T. Keith Glennan, president of Case Institute; Dr. Warren C. Johnson, director of physical sciences at the University of Chicago; Dr. Mervin J. Kelly, president of Bell Laboratories; Dr. Ezer V. Murphree, president of Esso Research & Engineering Co.; Dr. C. P. Rhoads, director of Memorial Hospital and Sloan-Kettering Institute; and Dr. J. C. Warner, president of Carnegie Institute of Technology.

make, the most vigorous efforts to bring about international agreement on a system of disarmament which would eliminate or reduce the production and testing of nuclear weapons."

## 1957 Imperial in Four Distinct Series

DETROIT, Oct. 20—The 1957 Imperial features "arrested-motion" styling, curved side glass, dual headlights and a fourway wraparound windshield. Offered for the first time in four distinct series in all popular body styles, the cars are four-inches lower and feature a new 392 cubic-inch FirePower V-8 engine. Shown above is the Imperial Crown four-door Southampton hardtop.

## New Models Will Go on Display Oct. 30

DETROIT, Oct. 20—An Imperial declared to be lower, sleeker and more powerful, featuring rakish, "arrested-motion styling," new torsion bar suspension, curved side glass, dual headlights and four-way wraparound windshield, was announced Saturday. The 1957 line will be unveiled at Imperial dealerships from coast to coast October 30.

"We are broadening the market for this finest forward look automobile by offering it for the first time in four distinct series and in every popular body style," said Clare E. Briggs, vice president in charge of sales, Chrysler Division, Chrysler Corporation.

"The 1957 Imperial incorporates such advanced engineering features as three-speed pushbutton TorqueFlite drive, ball joint torsion-bar front suspension, wider low-pressure 14-inch wheels, infinitely-adjustable six-way power seats, combined air conditioning and heating system, recessed safety door handles and torsion-bar top lock on the first Imperial convertible since 1931."

Featuring a new FirePower engine which delivers increased horsepower, the 1957 Imperials are declared to be nearly four inches lower and three inches wider, yet include more leg room and head room than last year's models.

A feeling of arrested motion is declared to be created by body lines in the general shape of a sleek wedge, a basic design said to incorporate the feeling of stability, poise and direction. Mass is concentrated at the rear. The eye is led forward by the convergent lines of the wedge, the design concept of advanced aircraft, racing cars and racing boats.

An anodized aluminum grille in small rectangular check stretches across the front, "emphasizing width and lowness." Headlights are set in chrome cylinders beneath airfoil-like brows projecting from the fender. Dual headlights for safety are available in those states where law's permit them.

Parking lights are recessed between split bars of the wraparound front bumper. An eagle and shield medallion decorates the forward edge of the hood above the grille opening.

TV HITS SCHOLARSHIP  
QUEBEC, Oct. 20 (AP)—A teacher's survey contends scholastic abilities of children in the Quebec city district are considerably impaired by TV. The teachers condemned telecasts of wrestling matches and praised programs prepared especially for children.

RAINS CAUSE 'DROUGHT'  
MANILA, Oct. 20 (AP)—Torrential rains on Samar Island in the eastern Philippines caused a drought in Cebu, the capital. The heavy rains loosed landslides that destroyed the waterlines supplying the city of 27,000.

## Illinois Fire Ends Lives of Four Children

GRAFTON, Ill., Oct. 20 (AP)—Flames trapped and burned to death three brothers and their sister today as they slept upstairs in their two-story frame home here. Valiant rescue attempts by neighbors went for naught.

Chief of Police Adam DeSherlia said the mother of the children, Mrs. Virginia Wahl, was awakened by smoke and ran screaming from the house.

Neighbors called the volunteer fire department and made three attempts to enter the burning home, but flames stopped them.

The dead: Irene, 11; Norbert Jr., 9; Homer, 8; and William, 12. The police chief said neighbors did not hear any of the children cry for help.

DeSherlia said Mrs. Wahl was suffering from shock and he hadn't been able to talk with her about the fire—the cause of which was not immediately known.

Grafton is a Mississippi River town of 1,100 in southwestern Illinois.

## Man Guilty of Manslaughter

PENDLETON, Ore., Oct. 20 (AP)—A circuit court jury Friday convicted Hollis Carl Doe, 20, Pendleton, of manslaughter in the shooting of a Tacoma man near here last month.

William Manzanarez Jr., 27, was shot to death after an argument on a highway Sept. 13. Doe surrendered to police a short while later.

He went on trial yesterday and the jur. began its deliberations this morning, returning a verdict 1 1/2 hours. Judge William W. Wells scheduled the sentencing at 9 a.m. next Wednesday.

Tasmania, part of Australia, consists of one large island and several smaller islands.

## Don't Start Married Life on Note of Anticipating Failure

By ANN LANDERS  
Dear Ann Landers: I'm a man in my late 40s and have never married. I operate a successful small business and own a lovely home.

Several months ago I met a bright career girl who is also single. We have a great deal in common and think together we could find happiness as man and wife.

I'm well aware we're set in our ways and marriage, late in life, is a difficult adjustment to make. We agreed if it doesn't work out to our mutual satisfaction in a year, we will part friends and be divorced. Don't you feel this is a mature, sound approach for two level-headed adults?—STILL FREE.

Do you go into a business deal with the idea that it doesn't work out you can always file in bankruptcy? Negative thinking leads to failure. A great part of succeeding, no matter what the undertaking, is being sold yourself. If you're going into marriage with your eye on the escape hatch, my advice is to forget about the whole thing.

Dear Ann Landers: I don't agree with the advice you gave "Sis Boat" in a recent column. He wanted to know whether or not to tell the girl next door that her married bus-driver Romeo was having affairs with several other women. You told him to "keep his brass shut."

Is this not contrary to the advice given by Ezekiel in Chapter 3 Verse 17? "I believe it is"—MRS. M.J.O.

Ezekiel's advice to "warn your neighbor against dangers he knows not of" was given even more clearly by Leviticus in Chapter 19 Verse 17. In my opinion, however, the advice doesn't apply to this particular problem.

A woman 35 who hands over her house keys to a married man is old enough to know better. It's not a warning that she needs but a set of moral standards. Nothing is so unwelcome as unsolicited advice. Ezekiel and Leviticus notwithstanding, the neighbor should keep his lip zipped.

Dear Ann: I had a small reception in my home for the daughter of a friend. We invited mostly church people and many of the guests were my friends and scarcely knew the family of the bride.

To my horror and surprise the groom spiked the punch. Needless to say, I was upset no end. Several of my friends gave me odd glances and before I realized what had happened most of the guests had left. What can I do about this shameful trick?—DISPLEASED HOSTESS.

The groom had no business altering the refreshments in your home. You can let him know he was strictly out of line.

Since no one had to be carried out or put to bed, you can assume no serious harm was done. Perhaps some of the guests thought the lemons were unusually strong.

Dear Ann Landers: I'm 58 and lost my dear husband 8 months ago. We had no children and were all the world to each other. I get very depressed and realize I must fill my life with something—but I don't know what.

I sold our home (couldn't stand the memories) and am renting a pleasant apartment. I have no financial worries. My problem is this: A young woman has been begging me to be her housekeeper. She's really in a spot. This girl is divorced, has two children 8 and 7 and has two of lowa
